Potential Significant Effects: Potential impacts on marine water quality and Scott Reef from large scale loss of hydrocarbons.	
Public Comments on Referral Information: Assess - API A : 0 Assess - API B : 0 Assess - PER : 0 Do Not Assess : 0 TOTAL COMMENTS : 0	
Explanation of Decision: The Torosa Subsea Development is the component of the Browse Floating LNG Development that is within State waters. The EPA considers that the likely environmental effects of the proposal are not so significant as to warrant formal assessment. The EPA also notes that the potential impacts can be mitigated, managed and regulated through other statutory processes. The Browse Floating LNG Development in Commonwealth waters is being formally assessed by the Commonwealth Department of the Environment, which also includes assessment of the environment of State waters impacted by the proposal.	Chairman's Initials: 
Officer: Chris Stanley	Date Signed: 11-2-15
Appeals close: 3 March 2015
