COMMENTS :	
Explanation of Decision: The EPA considers that the proposal is unlikely to have a significant effect on the environment and does not warrant formal assessment. The likely impacts from dewatering are temporary in nature and limited in extent. The potential impacts from the proposal can be adequately managed to meet the EPA's objectives through the implementation of the proponent's Acid Sulfate Soil and Dewatering Management Plan and Construction Environment Management Plan. This decision also constitutes as authorisation under the <i>Environmental Protection (Swan Coastal Plain Lakes) Policy 1992</i> .	Chairman's Initials:  3/12/2014
