

MINISTER FOR THE ENVIRONMENT

Statement No.

000635

**STATEMENT THAT A PROPOSAL MAY BE IMPLEMENTED
(PURSUANT TO THE PROVISIONS OF THE
ENVIRONMENTAL PROTECTION ACT 1986)**

IRON ORE MINE, DOWNSTREAM PROCESSING
(DIRECT-REDUCED & HOT-BRIQUETTED IRON)
AND PORT CONSTRUCTION,
CAPE PRESTON, PILBARA

Proposal: The construction and operation of a 44.8 million tonnes per annum iron ore mine, power station, desalination plant, processing plant and accommodation and port facilities in the Cape Preston area, as documented in schedule 1 of this statement. The processing plant will produce pelletised, direct-reduced iron and hot-briquetted iron.

Proponent: Mineralogy Pty. Ltd.

Proponent Address: Level 1, 220 St George's Terrace, PERTH WA 6000

Assessment Number: 1114

Report of the Environmental Protection Authority: Bulletin 1056

The proposal referred to above may be implemented by the proponent subject to the following conditions and procedures:

1 Implementation and Changes

- 1-1 The proponent shall implement the proposal as documented in schedule 1 of this statement subject to the conditions of this statement.
- 1-2 Where the proponent seeks to change any aspect of the proposal as documented in schedule 1 of this statement in any way that the Minister for the Environment determines, on advice of the Environmental Protection Authority, is substantial, the proponent shall refer the matter to the Environmental Protection Authority.

Published on

20 OCT 2003

- 1-3 Where the proponent seeks to change any aspect of the proposal as documented in schedule 1 of this statement in any way that the Minister for the Environment determines, on advice of the Environmental Protection Authority, is not substantial, the proponent may implement those changes upon receipt of written advice.

2 Proponent Commitments

- 2-1 The proponent shall implement the environmental management commitments documented in schedule 2 of this statement.
- 2-2 The proponent shall implement subsequent environmental management commitments which the proponent makes as part of the fulfilment of the conditions in this statement.

3 Proponent Nomination and Contact Details

- 3-1 The proponent for the time being nominated by the Minister for the Environment under section 38(6) or (7) of the *Environmental Protection Act 1986* is responsible for the implementation of the proposal until such time as the Minister for the Environment has exercised the Minister's power under section 38(7) of the Act to revoke the nomination of that proponent and nominate another person as the proponent for the proposal.
- 3-2 If the proponent wishes to relinquish the nomination, the proponent shall apply for the transfer of proponent and provide a letter with a copy of this statement endorsed by the proposed replacement proponent that the proposal will be carried out in accordance with this statement. Contact details and appropriate documentation on the capability of the proposed replacement proponent to carry out the proposal shall also be provided.
- 3-3 The nominated proponent shall notify the Department of Environmental Protection of any change of contact name and address within 60 days of such change.

4 Commencement and Time Limit of Approval

- 4-1 The proponent shall provide evidence to the Minister for the Environment within five years of the date of this statement that the proposal has been substantially commenced or the approval granted in this statement shall lapse and be void.

Note: The Minister for the Environment will determine any dispute as to whether the proposal has been substantially commenced.

- 4-2 The proponent shall make application for any extension of approval for the substantial commencement of the proposal beyond five years from the date of this statement to the Minister for the Environment, prior to the expiration of the five-year period referred to in condition 4-1.

The application shall demonstrate that:

- 1 the environmental factors of the proposal have not changed significantly;
- 2 new, significant, environmental issues have not arisen; and
- 3 all relevant government authorities have been consulted.

Note: The Minister for the Environment may consider the grant of an extension of the time limit of approval not exceeding five years for the substantial commencement of the proposal.

5 Surface Waters

- 5-1 Prior to clearing for and construction of (whichever is the sooner) the minesite accommodation village, the proponent shall demonstrate that it is positioned so as to minimise encroachment into the 100-year average recurrence interval flood levels, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority and the Water and Rivers Commission.
- 5-2 Prior to the final mine design plan, the proponent shall demonstrate using accurate topographic survey data, that the mine waste dump is positioned so as to minimise encroachment into the 100-year average recurrence interval flood levels, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority and the Water and Rivers Commission.
- 5-3 The proponent shall employ best practice measures in the design and construction of the waste rock dump and mine tailings storage facility to ensure that erosion and runoff from these structures, and all other project components, are minimised to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

6 Pit Dewatering and Vegetation Monitoring Plan

- 6-1 Prior to the commencement of pit dewatering, the proponent shall prepare a Pit Dewatering and Vegetation Monitoring Plan for the pit and its surrounding groundwater depletion zone, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

The objective of this plan is to allow deep-rooted vegetation, by extending their root systems, the maximum opportunity to adjust to the dropping water regime by dewatering the pit as slowly as possible, commensurate with the requirements of mining.

This Plan shall include monitoring of representative stands of creekline vegetation and other areas of conservation significance within the zone of groundwater depletion, to determine the extent of effects of groundwater drawdown on this vegetation.

- 6-2 The proponent shall implement the Pit Dewatering and Vegetation Monitoring Plan required by condition 6-1.
- 6-3 The proponent shall make the Pit Dewatering and Vegetation Monitoring Plan required by condition 6-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

7 Marine Management Plan

- 7-1 Prior to the commencement of construction of the jetty or commencement of dredging (whichever happens first) at Cape Preston, the proponent shall prepare a Marine Management Plan, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

The objectives of this Plan are:

- to accurately predict changes in coastal water movements, quality, residence times, bathymetry, sedimentology, beach alignment and habitat cover associated with the project; and
- to allow for appropriate management measures to be identified and implemented.

This Plan shall address, as part of the design process for the project:

- 1 detailed marine surveys to establish existing regimes of currents, bathymetry, sedimentology, shore alignment and habitat cover, and modelling to predict the changes to those regimes associated with the construction and operation of a causeway between Cape Preston and Preston Island;
- 2 the design of bridging structures or rock causeway, including open sections if required, to demonstrate that the regimes described in (1) above will not be adversely impacted;
- 3 the significance of, and changes to, habitats associated with dredging and dredge spoil dumping operations, and strategies to manage any associated environmental impacts;
- 4 the means to avoid significant damage to the high cover coral community at survey Location 9 to the north of Preston Island, including avoidance of dredging and spoil dumping during coral spawning events, from the construction and operational stages of the project;
- 5 detailed modelling of the areas of influence associated with the wastewater outfall location options with regard to temperature, salinity and discharged additives; and associated environmental effects;

- 6 coastal surveys to track changes, carried out for a sufficient period after construction and submitted to the Environmental Protection Authority, to monitor the effects of the bridging structure or rock causeway, and the wastewater outfall, together with other potential impacts from emissions and dust, impacts on mangroves, sandy beaches, or other coastal and marine ecosystems, including the corals off Preston Island; and
 - 7 strategies to restore environmental quality to acceptable levels if surveys referred to in (6) above demonstrate that significant impacts have occurred to mangroves, corals, beaches, nursery habitats or other sensitive coastal and marine ecosystems.
- 7-2 The proponent shall implement the Marine Management Plan required by condition 7-1.
- 7-3 The proponent shall make the Marine Management Plan required by condition 7-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

8 Marine Wastewater Outfall

- 8-1 Prior to the commencement of construction of the wastewater outfall, the proponent shall characterise seawater quality at the proposed intake, discharge points of the outfall, and at a suitable reference station, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.
- 8-2 Having regard for the findings arising from condition 8-1, prior to commencement of construction of the wastewater outfall, the proponent shall prepare a Wastewater Outfall Management Plan, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

This Plan shall:

- 1 provide a High level of protection to the waters in the region of Cape Preston, except for the Moderate Protection Mixing Zone surrounding the outfall, both of which zones will protect social values (swimming and fishing);
- 2 restrict the size of the Moderate Protection Mixing Zone surrounding the diffuser to four hectares in area;
- 3 protect sensitive habitats from the construction, layout and operation of the outfall;
- 4 develop monitoring and “feedback” programmes for the wastewater stream within the outfall to provide an early warning of potential risks to environmental quality;
- 5 develop monitoring of ecosystem health indicators in the receiving marine environment, and select appropriate control sites for inclusion in the monitoring programme;

- 6 ensure that the salinity variation resulting from the discharge is no greater than five percent above the ambient level for more than one percent of the time anywhere around Cape Preston (except within the proposed Moderate Protection Mixing Zone); and
 - 7 ensure that toxicant concentrations do not exceed the ninety percent species protection levels at the end of the outfall pipe for more than five percent of the time, nor exceed the ninety nine percent species protection levels at the edge of the Moderate Protection Zone.
- 8-3 The proponent shall implement the Wastewater Outfall Management Plan required by condition 8-2.
- 8-4 The proponent shall make the Wastewater Outfall Management Plan required by condition 8-2 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

9 Port Environmental Management Plan

- 9-1 Prior to the commencement of ground-disturbing activities at Cape Preston or Preston Island (whichever is the sooner), the proponent shall prepare a Port Environmental Management Plan to address emissions from the port berthing facility, product-handling facilities, desalination plant, and associated structures, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

This Plan shall also be submitted to the Department of Conservation and Land Management and the Department of Fisheries.

The objectives of this Plan are:

- to maintain an adequate level of water quality in waters surrounding the port;
- to minimise runoff and spills;
- to avoid ballast water contamination and the introduction of exotic marine organisms from ships' hulls; and
- to contain light spill so as to minimise impacts on turtles.

This Plan shall:

- 1 establish Environmental Quality Objectives (EKO) which explicitly identify uses and values and where they will be protected, and the appropriate Environmental Quality Criteria required to sustain each Environmental Quality Objective.

The Environmental Quality Objectives will include:

- the ecosystem health objective (EKO 1) as defined in the Environmental Protection Authority document *Perth's Coastal Waters, Environmental Values and Objectives* in the zones delineated in Figure 2 of schedule 1;

- the fishing and aquaculture objective (EQO 2) in the zones delineated in Figure 2 of schedule 1; and
- the recreational and aesthetic objectives (Environmental Quality Objectives 3 and 4, respectively) in the zones delineated in Figure 2 of schedule 1.

Note: The above Environmental Quality Objective zones are subject to review in both extent and the guideline values and standard criteria applying to them, and may be varied from time to time on advice of the Environmental Protection Authority.

- 2 ensure that light spill is contained to minimise impacts on turtles;
 - 3 ensure that runoff and spills are contained;
 - 4 incorporate an oilspill contingency plan;
 - 5 incorporate a ballast water management plan; and
 - 6 include a hull-fouling organisms management plan, which includes a risk assessment and a baseline marine survey for benthic and planktonic organisms in the area designated for ship berthing to minimise the risk of introduction of exotic marine organisms from ships' hulls.
- 9-2 The proponent shall implement the Port Environmental Management Plan required by condition 9-1.
- 9-3 The proponent shall make the Port Environmental Management Plan required by condition 9-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

10 Air Emissions

- 10-1 At least 12 months prior to completion of construction of the DRI plant or power station (whichever is the sooner), the proponent shall establish a meteorological station to gather site-specific data which will allow the calculation of atmospheric stability and more accurate modelling of air emissions. The parameters to be measured shall be determined in consultation with the Department of Environmental Protection.
- 10-2 Prior to completion of construction of the DRI plant or power station (whichever is the sooner), the proponent shall revise the air emission modelling using detailed design emissions levels and at least twelve months of site-specific meteorological data, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

10-3 Prior to commencement of construction of the DRI plant, the proponent shall investigate and implement best practice NOx control and measures to reduce NOx emissions from the pellet plant, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

10-4 Prior to commencement of construction of the DRI plant, the proponent shall prepare a Dust Management Plan which:

- 1 incorporates baseline and ongoing monitoring;
- 2 details management measures to minimise dust during construction;
- 3 demonstrates best practice and details the methods to be used for all point and fugitive sources;
- 4 incorporates monitoring to determine the size and composition of particulates;
- 5 incorporates further investigations into reactive DRI dust and details measures to minimise impacts;
- 6 provides for continuous improvements in dust management; and
- 7 details complaint response procedures;

to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

10-5 The proponent shall implement the Dust Management Plan required by condition 10-4, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

11 Greenhouse Gas Emissions

11-1 Prior to commencement of construction of the DRI plant or power station (whichever is the sooner), the proponent shall prepare a Greenhouse Gas Emissions Management Plan:

- to ensure that “greenhouse gas” emissions from the project are adequately addressed and best available efficient technologies are used to minimise total net “greenhouse gas” emissions and / or “greenhouse gas” emissions per unit of product; and
- to mitigate “greenhouse gas” emissions in accordance with the *Framework Convention on Climate Change 1992*, and consistent with the National Greenhouse Strategy (subject to the qualifications to those measures referred to at page 37 of Environmental Protection Authority Bulletin 1056, July 2002);

to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

This Plan shall include:

1. up-to-date calculation of the “greenhouse gas” emissions associated with the proposal, as indicated in *Minimising Greenhouse Gas Emissions, Guidance for the Assessment of Environmental Factors, No.12* published by the Environmental Protection Authority;
2. specific measures to minimise the total net “greenhouse gas” emissions and/or the “greenhouse gas” emissions per unit of product associated with the proposal;
3. monitoring of “greenhouse gas” emissions;
4. up-to-date estimation of the “greenhouse gas” efficiency of the project (per unit of product and/or other agreed performance indicators) and comparison with the efficiencies of other comparable projects producing a similar product;
5. analysis of the extent to which the proposal meets the requirements of the National Greenhouse Strategy using a combination of:
 - “no regrets” measures;
 - “beyond no regrets” measures;
 - land use change or forestry offsets; and
 - international flexibility mechanisms; and
6. a target set by the proponent for the reduction of total net “greenhouse gas” emissions and/or “greenhouse gas” emissions per unit of product over time, and annual reporting of progress made in achieving this target.

Note: In part 5 above, the following definitions apply:

1. “no regrets” measures are those that can be implemented by a proponent which are effectively cost-neutral and provide the proponent with returns in savings which offset the initial capital expenditure that may be incurred; and
2. “beyond no regrets” measures are those that can be implemented by a proponent which involve some additional cost that is not expected to be recovered.

11-2 The proponent shall implement the Greenhouse Gas Emissions Management Plan required by condition 11-1.

11-3 The proponent shall make the Greenhouse Gas Emissions Management Plan required by condition 11-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

12 Noise Management Plan

12-1 Prior to the commencement of ground-disturbing activities, the proponent shall prepare a Noise Management Plan to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

This Plan shall include:

1. modelling of cumulative noise levels associated with components of the expanded project at personnel accommodation sites, the project boundary and at the public campsite near the mouth of the Fortescue River; and
2. a strategy to protect popular “visitor locations” from undue noise levels associated with the project.

12-2 The proponent shall implement the Noise Management Plan required by condition 12-1.

12-3 The proponent shall make the Noise Management Plan required by condition 12-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

13 Recreational Use Management Plan

13-1 Prior to the commencement of ground-disturbing activities, the proponent shall prepare a Recreational Use Management Plan, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

This Plan shall include:

- 1 a strategy to maintain public access to recognised “visitor locations” including the Fortescue River mouth and permanent pools along the river (as committed to by the proponent);
- 2 consideration and steps to facilitate maintenance of appropriate fishing practices by employees (as committed to by the proponent); and
- 3 strategies to protect popular “visitor locations” (such as the mouth of the Fortescue River and permanent pools along it).

13-2 The proponent shall implement the Recreational Use Management Plan required by condition 13-1, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

13-3 The proponent shall make the Recreational Use Management Plan required by condition 13-1 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

14 Compliance Audit and Performance Review

14-1 The proponent shall prepare an audit program and submit compliance reports to the Department of Environmental Protection which address:

- 1 the implementation of the proposal as defined in schedule 1 of this statement;
- 2 evidence of compliance with the conditions and commitments; and
- 3 the performance of the environmental management plans and programs.

Note: Under sections 48(1) and 47(2) of the *Environmental Protection Act 1986*, the Chief Executive Officer of the Department of Environmental Protection is empowered to audit the compliance of the proponent with the statement and should directly receive the compliance documentation, including environmental management plans, related to the conditions, procedures and commitments contained in this statement.

14-2 The proponent shall submit a performance review report every six years after the start of the operations phase, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority, which addresses:

- 1 the major environmental issues associated with the project; the targets for those issues; the methodologies used to achieve these; and the key indicators of environmental performance measured against those targets;
- 2 the level of progress in the achievement of sound environmental performance, including industry benchmarking, and the use of best available technology where practicable;
- 3 significant improvements gained in environmental management, including the use of external peer reviews;
- 4 stakeholder and community consultation about environmental performance and the outcomes of that consultation, including a report of any on-going concerns being expressed; and
- 5 the proposed environmental targets over the next six years, including improvements in technology and management processes.

15 Conservation Estate

15-1 In the event that the port facilities at Preston Island are to be developed, the proponent, in consultation with the Department of Conservation and Land Management and the Conservation Commission of Western Australia, shall determine and report on appropriate mitigatory measures to aid the conservation effort in the vicinity of the project area, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

15-2 Prior to construction of the port facility, the proponent shall incorporate the mitigatory measures referred to in condition 15-1 into a Conservation Estate Management Plan which addresses the following:

- 1 the effect of the port facility on the conservation values of the Great Sandy Island Nature Reserve, of which Preston Island is a part;
- 2 the potential effects of the port development, including dredging, spoil dumping and causeway / bridging structures on the Cape Preston area, which is a part of the proposed Dampier Archipelago / Cape Preston Marine Conservation Reserve; and
- 3 mitigatory measures to address the above effects,

to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

15-3 The proponent shall implement the Conservation Estate Management Plan required by condition 15-2 to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

15-4 The proponent shall make the Conservation Estate Management Plan required by condition 15-2 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

16 Decommissioning and Closure Plans

16-1 Prior to construction, the proponent shall prepare and subsequently implement a Preliminary Decommissioning and Closure Plan, which provides the framework to ensure that the project area is left in an environmentally acceptable condition to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

The Preliminary Decommissioning and Closure Plan shall address:

1. rationale for the siting and design of plant and infrastructure as relevant to environmental protection, and conceptual plans for the removal or, if appropriate, retention of plant and infrastructure;
2. long-term management of ground and surface water systems affected by the mine tailings storage facility and waste rock dumps;
3. a conceptual rehabilitation plan for all disturbed areas and a description of a process to agree on the end land use(s) with all stakeholders;
4. a conceptual plan for a care and maintenance phase; and
5. management of noxious materials to avoid the creation of contaminated areas.

16-2 At least five years prior to the anticipated date of closure, or at a time agreed with the Environmental Protection Authority, the proponent shall prepare a Final Decommissioning and Closure Plan designed to ensure that the site is left in an environmentally acceptable condition to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

The Final Decommissioning and Closure Plan shall address:

1. removal or, if appropriate, retention of plant and infrastructure in consultation with relevant stakeholders;
2. long term management of ground and surface water systems affected by the mine tailings storage facility and waste rock dumps;
3. rehabilitation of all disturbed areas to a standard suitable for the agreed new land use(s); and
4. identification of contaminated areas, including provision of evidence of notification and proposed management measures to relevant statutory authorities.

16-3 The proponent shall implement the Final Decommissioning and Closure Plan required by condition 16-2 until such time as the Minister for the Environment determines, on advice of the Environmental Protection Authority, that the proponent's closure responsibilities are fulfilled.

16-4 The proponent shall make the Final Decommissioning and Closure Plan required by condition 16-2 publicly available, to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority.

Procedures

- 1 Where a condition states "to the requirements of the Minister for the Environment on advice of the Environmental Protection Authority", the Chief Executive Officer of the Department of Environmental Protection will obtain that advice for the preparation of written advice to the proponent.
- 2 The Environmental Protection Authority may seek advice from other agencies, as required, in order to provide its advice to the Chief Executive Officer of the Department of Environmental Protection.

Notes

- 1 The Minister for the Environment will determine any dispute between the proponent and the Environmental Protection Authority or the Department of Environmental Protection over the fulfilment of the requirements of the conditions.

- 2 The proponent is required to apply for a Works Approval and Licence for this project under the provisions of Part V of the *Environmental Protection Act 1986*.

Judy Edwards

Dr Judy Edwards MLA
MINISTER FOR THE ENVIRONMENT

20 OCT 2003

Schedule 1

The Proposal (Assessment No. 1114)

The proposal is to establish and operate an iron ore mine, process plant (pelletising, direct-reduced iron and hot-briquetted iron), accommodation and port facility in the Cape Preston area. (Figure 1 shows the project site).

The project has the following main components:

- conventional open pit mining of the George Palmer orebody (Figure 2);
- stockpiling, waste and tailings storage facilities at the mine site;
- process plant for pelletising, and the production of direct-reduced iron and hot-briquetted iron;
- gas-fired power station;
- 25 kilometre long infrastructure corridor (conveyor or haul road) from the mine and process plant site to Cape Preston;
- bridging structures or rock causeway from Cape Preston to Preston Island; and
- stockpiling, seawater desalination plant and port facilities at Cape Preston and off Preston Island.

Dewatering will be required during mining as there will be mining below the water table.

Table 1 - Key Proposal Characteristics, as modified during the process of assessment (Assessment No. 1114)

Element	Description
MINE	
Mine ore reserves	greater than 1400 million tonnes iron ore
Depth of pit	approximately 220 metres, left open at end of mining
Rate of mining	approximately 44.8 million tonnes per annum
Projected mine life	at least 20 years
PROCESS PLANT	
Concentrator rate	approximately 13.4 million tonnes per annum
Produced waste to tailings storage	approximately 31.4 million tonnes per annum
Pellet production	approximately 13.8 million tonnes per annum
Direct reduced / hot briquetted iron	approximately 4.7 million tonnes per annum
Gas usage	55,280Tjpa
INFRASTRUCTURE	
Power station capacity; gas usage	640MW; 34,170Tjpa
Product conveyor / haulroad	25km from process plant at minesite to Cape Preston port
Groundwater borefield	Groundwater will be required to supplement operational stage needs*.
Pit dewatering	Water of suitable quality used to supplement requirements
Desalinated seawater	approximately 44Mm ³ /pa
Brine disposal	57.8Mm ³ /pa
Administration, storage, workshops,	sewage treatment plant, village, port facilities
PORT	
Product stockyard capacity	approximately 1 million tonnes
Bridging structures or rock causeway to Preston Island	approximately 1.1kilometres, bridging structures or rock causeway to island, then trestle jetty seawards
Small craft harbour and import berth	
Dredging	up to 4.5 million cubic metres, disposed offshore
AREAS OF DISTURBANCE	
Pit	approximately 220ha
Plant and power station site	approximately 220ha
Waste dumps	approximately 465ha
Tailings storage	approximately 800ha
Other mine infrastructure	approximately 185ha
Port stock yard	approximately 25ha
Total for rehabilitation	approximately 1696ha

* - The quantity of groundwater is to be determined by the relevant decision-making authority.

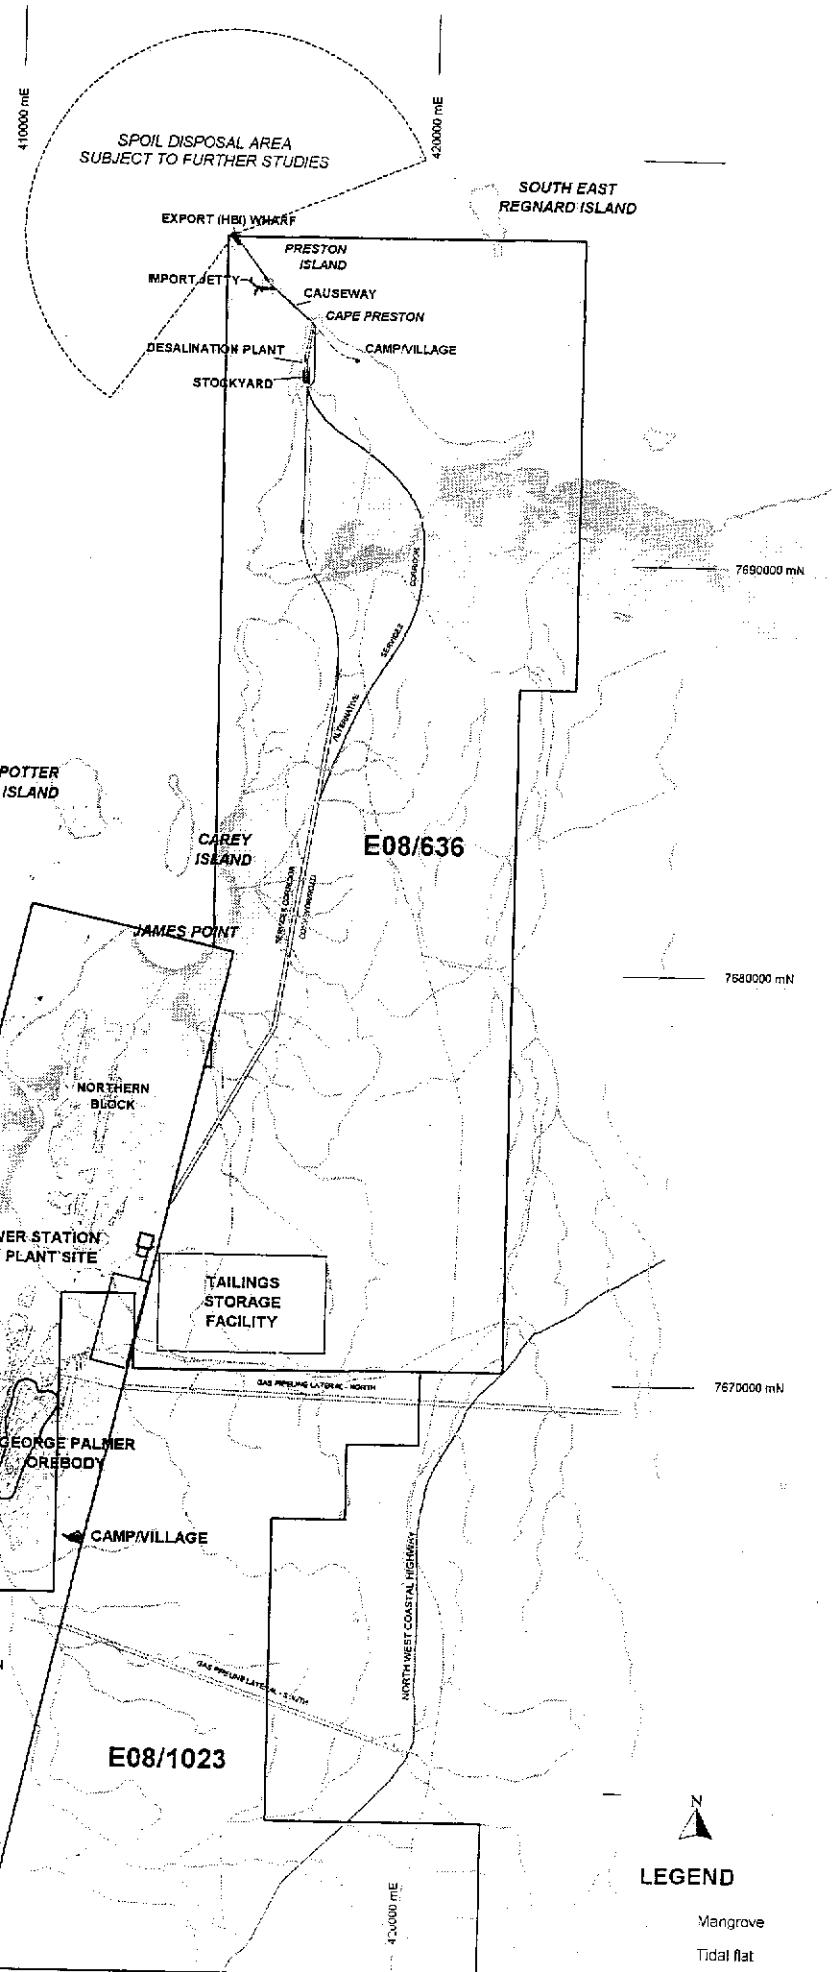

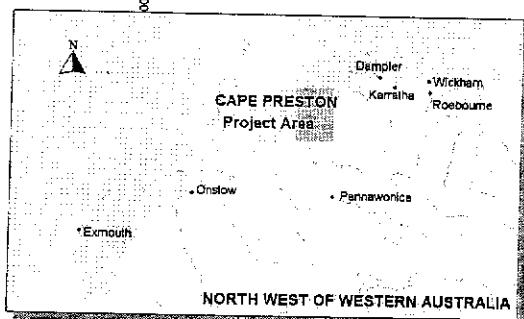

Abbreviations

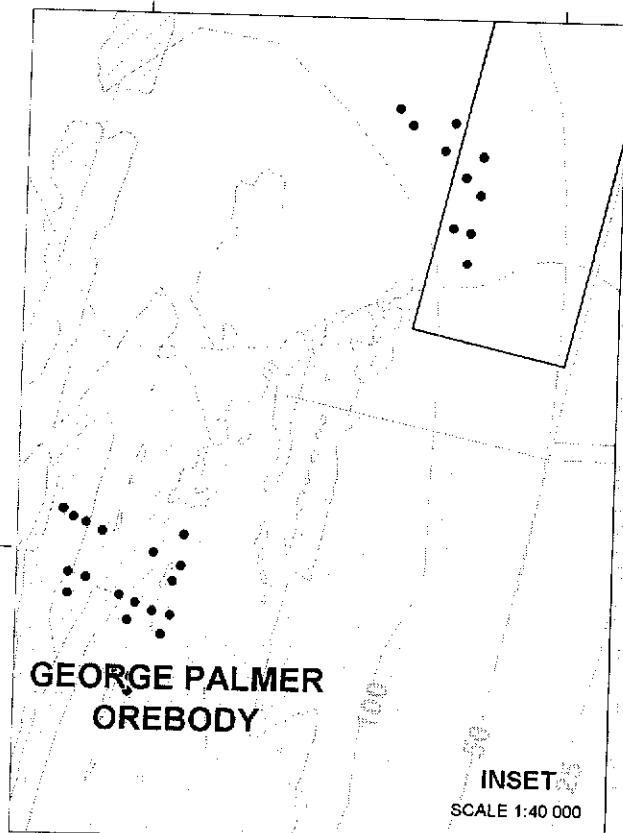

m	metres	km	kilometres
mtpa	million tonnes per annum	Mm ³ /pa	million cubic metres per annum
MW	megawatts	ha	hectares
Tjpa	terajoules per annum

Proponent's Environmental Management Commitments

August 2003

**IRON ORE MINE, DOWNSTREAM PROCESSING
(DIRECT-REDUCED & HOT-BRIQUETTED IRON)
AND PORT CONSTRUCTION,
CAPE PRESTON, PILBARA**

(Assessment No. 1114)

Mineralogy Pty. Ltd.

Schedule 2

**Iron Ore Mine, Downstream Processing (Direct-reduced & Hot-briquetted Iron) and Port Construction, Cape Preston, Pilbara
(Assessment No. 1114)**

Proponent's Environmental Management Commitments, as modified during the course of the project assessment, and subsequently.

Note: The term "commitment" as used in this schedule includes the entire row of the table and its six separate parts as follows:

- a commitment number;
- a commitment topic;
- the objective of the commitment;
- the "action" to be undertaken by the proponent;
- the timing requirements of the commitment; and
- the body/agency to provide technical advice to the Department of Environmental Protection.

No.	Topic	Objective	Action	Timing	Advice
1.	Environmental Management System	To manage the relevant environmental factors and to fulfil the requirements of the conditions and procedures in the Ministerial Statement.	<p>Prepare and implement an Environmental Management System (EMS) for the project, to include:</p> <ol style="list-style-type: none"> 1. an environmental policy and corporate commitment to the EMS 2. planning to meet environmental requirements 3. specification and implementation of actions to meet environmental requirements 4. measurement and evaluation of environmental performance 5. review and improvement of environmental outcomes <p>The Management Plans identified below will form part of the EMS.</p>	<p>A Construction Phase EMS will be completed prior to construction.</p> <p>An Operations Phase EMS will be substantially completed prior to operations.</p>	Accredited assurance service.
2.	Environmental Management Programme	To manage the potential impacts of the construction and operations phases of the project.	<p>Prepare, implement and regularly revise an Environmental Management Programme (EMP).</p> <p>The EMP will contain plans, guidelines and procedures to manage environmental issues associated with construction and operation of the project, including:</p> <ol style="list-style-type: none"> 1. flora and fauna monitoring and management plans (see Commitments 3, 5, 6 and 16) 2. overburden storage 3. pit dewatering and vegetation monitoring plan (see Commitment 4). 4. marine management plan (see Commitment 7). 5. spill contingency plan (see Commitment 10) 6. port management plan 7. surface water (including flood) management (see Commitment 8) 	<p>A Construction Phase EMP will be prepared prior to construction.</p> <p>An Operations Phase EMP will be prepared prior to operations.</p>	DolR, CALM, WRC and OMP (depending on the project component).

No.	Topic	Objective	Action	Timing	Advice
			8. groundwater management (see Commitment 9) 9. dust and noise 10. gaseous emissions 11. greenhouse gas emissions plan 12. risks and hazards management plan 13. Aboriginal sites management plan (see Commitment 12); and 14. decommissioning and closure plan .		
3.	Flora survey	To determine vegetation species in the 25km infrastructure corridor.	Undertake a flora survey – in particular in the cracking clay environment. If any specimens of the Priority 1 species <i>Goodenia pallida</i> are identified, a management strategy will be developed with CALM.	Prior to ground disturbance and after significant rains	CALM
4.	Vegetation Monitoring Plan	To determine the extent of vegetation loss from mining, groundwater drawdown and associated project activities.	Prepare a Vegetation Monitoring Plan to determine the extent of creekline vegetation loss. Establish transects across the drawdown zone and compare health of vegetation with control transects. Establish vegetation monitoring at other sensitive locations (such as the infrastructure corridor crossing of the mangrove creek). Implement the Vegetation Monitoring Plan.	Prior to pit dewatering During dewatering	
5.	Mesquite (<i>Prosopis pallida</i> hybrid) Control Plan	To reduce the incidence of Mesquite and prevent its spread into areas disturbed by the project.	Undertake Mesquite control as an active member of the Mesquite Control Committee, such activities as determined with the Mesquite Control Committee.	Once the proponent has established a permanent presence in the area –during construction	Department of Agriculture and Mesquite Control Committee
6.	Fauna Management Plan	To establish the importance of specific areas for wading birds and turtles in order to avoid sensitive areas and ensure their protection from project – induced impacts.	Prepare a Fauna Management Plan which will include: 1. fauna counts at appropriate times of the year; and 2. results from the turtle baseline survey to develop strategies that protect nesting areas and minimise effects of lighting Implement the Fauna Management Plan.	Prior to construction of the jetty at Cape Preston During construction and operational phases	CALM
7.	Ballast Water Management	To minimise the potential release of exotic organisms to the marine environment.	Prepare a Ballast Water Management Plan which will contain plans, guidelines and procedures on the methods to be employed to minimise the potential release of exotic organisms. The plan will be provided to all shippers. Implement the Ballast Water Management Plan.	Prior to operations. During operations.	AQIS

No.	Topic	Objective	Action	Timing	Advice
8.	Surface Water Management Plan	To manage the potential effects of operations on surface water regimes; maintain existing catchment flow volumes and quality, and maintain existing flow paths, where possible.	<p>Prepare a Surface Water Management Plan to cover:</p> <ol style="list-style-type: none"> 1. normal surface runoff; 2. armouring of the waste dump; and 3. flood diversion works, <p>and will use and contain plans, updated cross sections of the floodplain, updated modelling of streamflows from WRC guidelines and procedures to manage environmental issues relating to the potential effects of operations on the surface water regimes across the Fortescue River Floodplain.</p> <p>Implement the Surface Water Management Plan.</p>	<p>Prepared and implemented prior to mining.</p> <p>Design and implement flood diversion works prior to construction of any flood diversion works.</p> <p>During construction and operations</p>	WRC and CALM
9.	Prepare a Groundwater Management Plan	To confirm the extent of groundwater drawdown and prevent adverse impacts on the groundwater users of the area.	<p>Prepare a Groundwater Management Plan addressing:</p> <ol style="list-style-type: none"> 1. the effects of the operations on groundwater quantity and quality; 2. maintenance of the existing pastoral camp stock water supplies and the bore used by the Mesquite control camp; and 3. establishment and locations for groundwater quality monitoring bores. <p>Implement the Groundwater Management Plan</p>	<p>Prior to dewatering.</p> <p>During construction and operations</p>	WRC and Department of Agriculture.
10.	Spill Contingency Plan	To ensure protection of the marine environment from spills.	Prepare and implement (as necessary) a Spill Contingency Plan. The Spill Contingency Plan will contain plans, guidelines and procedures to manage any spillage.	Prior to operations.	Australian Maritime Safety Authority.
11.	Final project layout	To ensure that project components minimise encroachment into 100 year ARI* flood levels.	<p>Liaise with Water and Rivers Commission on the siting of project components and equipment.</p> <p>*ARI – average recurrence interval.</p>	Prior to final mine design plans.	CALM, WRC and OMP.
12.	Aboriginal Sites Management Plan	To identify heritage sites, ensure no sites are inadvertently damaged and that sites which conflict with the project are first submitted to DIA for approvals to disturb.	<p>Prepare an Aboriginal Sites Management Plan. This will include:</p> <ol style="list-style-type: none"> 1. consultation with traditional owners in respect of additional Aboriginal site surveys in areas not already surveyed; 2. further consultation with representatives of the claimant groups; 3. additional surveys in areas not already surveyed within the project area that are likely to be disturbed or otherwise affected by mining operations, downstream processing or export operations and associated infrastructure; 	Prior to construction	Department of Indigenous Affairs.

No.	Topic	Objective	Action	Timing	Advice
			<p>4. delineation of sites with respect to project components with adjustments where appropriate to the location of those components; and</p> <p>5. abiding by the recommendations made in the project ethnographic survey (O'Connor, 2001).</p> <p>Implement the Aboriginal Sites Management Plan.</p>	During construction and operations.	
13.	Public access to sites for recreational purposes	To ensure continued public access for recreational activities.	Maintain public access to the mouth of the Fortescue River and to other sites required for recreational purposes following discussions with local Shire and CALM on an acceptable alternative route. Install appropriate signage.	Prior to construction.	Shire of Roebourne
14.	Carbon Sequestration	To mitigate effect of Greenhouse emissions	Establish a plantation crop(s) of trees at the rate of in the order of 100,000 trees per annum for 10 years.	Commencing no later than 12 months after production commences from the 3 modules of the DRI plant	
15.	Conservation Estate	To mitigate any effect of the project on the conservation estate	Establish a plantation crop(s) of trees at the rate of in the order of 50,000 trees per annum for 10 years.	Commencing no later than 12 months after production commences from the 3 modules of the DRI plant	
16.	Subterranean Fauna	To determine any significant effect on species of stygofauna as a consequence of mining operations on mining leases 08/123 and 08/124.	<p>In consultation with an Australian University, design and implement a stygofauna assessment program. The program will:</p> <ol style="list-style-type: none"> 1. identify the species of stygofauna collected from within mining leases 08/123 and 08/124; 2. assess the conservation significance of the species found; 3. map the distribution of the species found, within the immediate vicinity of the mine; and 4. monitor stygofauna presence and distribution in the immediate vicinity of the mine for 5 years commencing on construction. 	To commence prior to commencement of drawdown of aquifer	
17.	Personnel induction	Ensure responsible use of the project area and the surrounding region by project personnel.	Protect sensitive fishery nursery habitats from overfishing by including appropriate references to fishing practices in the personnel induction programme and liaising with the Department of Fisheries and CALM to establish conservation values and strategies to maintain them.	Prior to construction	CALM and Department of Fisheries

No.	Topic	Objective	Action	Timing	Advice
18.	Best practice	To ensure high levels of appropriate management throughout all phases of the proposal and appropriate ongoing research.	Implement best practice environmental management and decommissioning and rehabilitation management plans within the project. Details of progress against management objectives will be reported in Annual Environmental Reports.	Develop prior to construction and implement during operations

Attachment 1 to Statement 635

Change to Proposal

Proposal: Iron Ore Mine, Downstream Processing (Direct-Reduced & Hot-Briquetted Iron) and Port Construction, Cape Preston, Pilbara

Table 1 - Key Proposal Characteristics Table (Modified as per Proposed Change – see bold type)

Element	Description
MINE	
Mine ore reserves	greater than 1400 million tonnes iron ore
Depth of pit	approximately 220 m, left open at end of mining
Rate of mining	approximately 67.4 Mtpa (assessed rate 44.8 Mtpa)
Projected mine life	at least 20 years
PROCESS PLANT	
Concentrator rate	approximately 19.6 Mtpa (assessed rate 13.4 Mtpa)
Produced waste to tailings storage	approximately 47.8 Mtpa (assessed rate 31.4 Mtpa)
Pellet production	approximately 13.8 Mtpa
Direct reduced / hot briquetted iron	approximately 4.7 Mtpa
Gas usage	55,280 Tjpa
INFRASTRUCTURE	
Power station capacity; gas usage	640 megawatts; 34,170 Tjpa
Product conveyor / haulroad	25 km from process plant at minesite to Cape Preston port
Groundwater borefield	Groundwater will be required to supplement operational stage needs*
Pit dewatering	Water of suitable quality used to supplement requirements
Desalinated seawater	approximately 44 Mm ³ pa
Brine disposal	57.8 Mm ³ pa
Administration, storage, workshops, sewage treatment plant, village, port facilities	
PORt	
Product stockyard capacity	approximately 1 million tonnes
Bridging structures or rock causeway to Preston Island	approximately 1.1 km, bridging structures or rock causeway to island, then trestle jetty seawards
Small craft harbour and import berth	
Dredging	up to 4.5 Mm ³ , disposed offshore
AREAS OF DISTURBANCE	
Pit	approximately 220 ha
Plant and power station site	approximately 220 ha
Waste dumps	approximately 465 ha
Tailings storage	approximately 800 ha
Other mine infrastructure	approximately 185 ha
Port stockyard	approximately 25 ha
Total for rehabilitation	approximately 1696 ha

* The quantity of groundwater is to be determined by the relevant decision-making authority.

m	metres	Tjpa	terajoules per annum

Approved: 8 September 2004

Attachment 2 to Statement 635

Change to Proposal

Proposal: Iron Ore Mine, Downstream Processing (Direct-Reduced & Hot-Briquetted Iron) and Port Construction, Cape Preston, Pilbara

Proponent: Mineralogy Pty Ltd

Change: Changes in support infrastructure as follows:

- an increase in area for the processing plant, port stockyard, services corridor (road/pipelines) and accommodation camps;
- replacement of the accommodation village on Cape Preston with an accommodation village on the “mainland”, which will serve, firstly, as a construction camp and then as the sole permanent village for operations of the mine and port;
- increase in disturbance footprint within the services corridor;
- replacement of the conveyor with a slurry pipeline and dewatering plant; and
- additional pipelines within the disturbance area.

Components of Original Proposal as amended:

Component	Quantities/Description
INFRASTRUCTURE	
Product conveyor / haul road	25 km from process plant at minesite to Cape Preston port
Village	(Not specified)
AREAS OF DISTURBANCE	
Plant and power station site	approximately 220 ha
Port stockyard	approximately 25 ha

Components of changed Proposal: See over.

Attachment 2 to Statement 635 – continued.

Components of changed Proposal:

Component	Quantities/Description
INFRASTRUCTURE	
Product conveyor / haul road (Services Corridor)	25 km from mine site to port at Cape Preston - average width 55 m; and 81m at crossing from mainland to Cape Preston. (138 ha area of disturbance) <ul style="list-style-type: none"> • road • buried slurry pipeline replaces conveyor • dewatering plant at the port • additional buried pipelines (potable water, gas and diesel) • power transmission line
Accommodation villages	One permanent village - located on mainland north of the mine, opposite Carey Island (up to 970 people). Village also used as construction camp. (20 ha area of disturbance) Two construction camps located on-site - on ML08/123 (45 ha) and at permanent village site. (65 ha total area of disturbance)
AREAS OF DISTURBANCE	
Plant and power station site	approximately 270 ha
Port stockyard and infrastructure	approximately 48 ha

Attachment 3 to Statement 635

Change to Proposal

Proposal: Iron Ore mine, Downstream Processing and Port Construction,
Cape Preston Pilbara
Proponent: Mineralogy Pty Ltd

Change: Relocation of proposed pellet plant from its original location near the project minesite to the project port on Cape Preston.

Components of original Proposal:

Component	Quantities/Description
Pellet Plant	Located at minesite

Components of changed Proposal:

Component	Quantities/Description
Pellet Plant	Located near project port facilities as indicated in Figure 2

Attachment 4 to Statement 635

Change to Proposal

Proposal: Iron Ore Mine, Downstream Processing (Direct-Reduced & Hot Briquetted Iron) and Port Construction, Cape Preston, Pilbara

Proponent: Mineralogy Pty Ltd

Change: Changes to the mine and processing as follows:

- an increase in area of the mine pit;
- increases in mining and processing rates; and
- an increase in area of the waste rock dumps, including an additional waste rock dump; and an increase in area of the tailings storage facility; and an increase in disposal rate.

Components of Original Proposal as amended:

Component	Quantities/Description
MINE	
Rate of mining	approximately 67.4 Mtpa
PROCESS PLANT	
Concentrator rate	approximately 19.6 Mtpa
Produced waste to tailings storage	approximately 47.8 Mtpa
INFRASTRUCTURE	
Power station capacity; gas usage	640 megawatts; 34,170 Tjpa
AREAS OF DISTURBANCE	
Pit	approximately 220 ha
Waste dumps	approximately 465 ha
Tailings storage	approximately 800 ha

Components of changed Proposal: See over.

Attachment 4 to Statement 635 – continued.

Components of changed Proposal:

Component	Quantities/Description
MINE	
Rate of mining	approximately 95 Mtpa
PROCESS PLANT	
Concentrator rate	approximately 27.6 Mtpa
Produced waste to tailings storage	approximately 67.4 Mtpa
INFRASTRUCTURE	
Power station capacity; gas usage	640 megawatts; 34,170 Tjpa
AREAS OF DISTURBANCE	
Pit	approximately 360 ha
Waste dumps	approximately 600 ha <ul style="list-style-type: none"> • North-east (approximately 175 ha) • Western (approximately 184 ha) • South-east (approximately 241 ha)
Tailings storage	approximately 880 ha

Attachment 5 to Ministerial Statement 635

Change to proposal approved under section 45C of the *Environmental Protection Act 1986*

This Attachment replaces Schedule 1 and Attachment 1 to 4 of Ministerial Statement 635

Proposal: Iron Ore Mine, Downstream Processing (Direct-reduced and Hot-briquetted Iron) and Port, Cape Preston, WA

Proponent: Sino Iron Pty Ltd and Korean Steel Pty Ltd

Changes:

- Increase to disturbance area for roads, infrastructure associated with the Tailings Storage Facility and for a dewater discharge pipeline;
- Construction of a dewater discharge pipeline from mine to a proposed discharge location near the mouth of the Fortescue River; and
- Discharge dewatered groundwater from the mine site to a location near the mouth of the Fortescue River.

Table 1: Summary of the Proposal

Proposal Title	Iron Ore Mine, Downstream Processing (Direct-reduced and Hot-briquetted Iron) and Port, Cape Preston, WA		
Short Description	The proposal is to establish and operate an iron ore mine, process plant (pelletising, direct-reduced iron and hot briquetted iron), accommodation and port facility in the Cape Preston area.		

Table 2: Location and authorised extent of physical and operational elements

Element	Location	Previously Authorised Extent	Authorised Extent
MINE			
Mine ore reserves	Figure 1	>1400 million tonnes iron ore	Deleted as not an environmentally significant key proposal characteristic
Depth of Pit	Figure 1	Approximately 220 m	Up to 220 m
Rate of mining		Approximately 95 mtpa	Up to 95 Mtpa
Projected mining life		At least 20 years	Deleted as not an environmentally significant key proposal characteristic
PROCESS PLANT			
Concentrator Rate		Approximately 27.6 Mtpa	Up to 27.6 Mtpa
Produced waste to tailings storage		Approximately 67.4 Mtpa	Up to 67.4 Mtpa
Pellet production		Approximately 13.8 Mtpa (Moved to near project port facilities)	Up to 13.8 Mtpa
Direct reduced/hot briquetted iron	Figure 1	Approximately 4.7 Mtpa	Up to 4.7 Mtpa

Attachment 5 to Ministerial Statement 635 – continued.

Element	Location	Previously Authorised Extent	Authorised Extent
Gas usage		55,280 Tjpa	Deleted as not an environmentally significant key proposal characteristic
INFRASTRUCTURE			
Power Station capacity; gas usage		640MW; 34,170 Tjpa	640MW
Product conveyor/ haul road	Figure 1	<p>25 km from mine site to port at Cape Preston – average width 55 m, 81 m at crossing from mainland to Cape Preston Road.</p> <ul style="list-style-type: none"> • Buried slurry pipeline replaces conveyor • Dewatering plant at the port • Additional buried pipelines • Power transmission lines 	<p>25 km from mine site to port at Cape Preston – average width 55 m, 81 m at crossing from mainland to Cape Preston Road.</p> <ul style="list-style-type: none"> • Buried slurry pipeline replaces conveyor • Dewatering plant at the port • Additional buried pipelines • Power transmission lines
Groundwater bore field		Groundwater will be required to supplement operational stage needs.	Amount to be determined by relevant decision making authority.
Pit dewatering		Water of suitable quality used to supplement requirements.	Water of suitable quality used to supplement requirements.
Dewater discharge	Figure 2	Not applicable	Disposal of up to 2 GL per annum of dewatered groundwater to Fortescue River
Desalinated seawater	Figure 1	Approximately 44 million metres cubed per annum (Mm ³ pa)	Up to 44 GL per annum
Brine disposal	Figure 1	57.8 Mm ³ pa	Up to 57.8 GL per annum
Admin, storage, workshops		Sewage treatment plant, village, port facilities.	Deleted as not an environmentally significant key proposal characteristic.
Accommodation Village	Figure 1	<p>Accommodation village: one permanent village – located on mainland north of the mine, opposite Carey island (up to 970 people).</p> <p>Village also used as construction camp.</p> <p>Two construction camps located onsite, on ML08/123 and at permanent village sites.</p>	<p>Accommodation village: one permanent village – located on mainland north of the mine, opposite Carey island (up to 970 people).</p> <p>Village also used as construction camp.</p> <p>Two construction camps located onsite, on ML08/123 and at permanent village sites.</p>

Attachment 5 to Ministerial Statement 635 – continued.

Element	Location	Previously Authorised Extent	Authorised Extent
PORt			
Product stockyard capacity		Approximately 1 Mt	Approximately 1 Mt
Bridging structures or rock causeway to Preston Island	Figure 1	Approximately 1.1 km, bridging structures or rock causeway to island, then trestle jetty.	Approximately 1.1 km, bridging structures or rock causeway to island, then trestle jetty.
Dredging		Up to 4.5 million metres cubed, (Mm ³) disposed offshore.	Up to 4.5 million metres cubed, (Mm ³) disposed offshore.
AREAS OF DISTURBANCE			
Mine pit,	Figure 1	360 ha	No more than 360 ha
Waste dumps	Figure 1	600 ha	No more than 600 ha
Tailings storage (and associated infrastructure)	Figure 1	880 ha	No more than 987 ha
Other mine infrastructure	Figure 1	185 ha	No more than 736 ha
Discharge groundwater pipeline	Figure 1 & 2	Not applicable	No more than 3 ha within a development envelope of 173 ha
Port stockyard	Figure 1	48 ha	No more than 48 ha
Total	Figures 1 & 2	2546 ha	No more than 2734 ha

Note: Text in **bold** in Table 2 indicates a change to the proposal.

Table 3: Abbreviations

Abbreviation	Term
ha	hectare
km	kilometre
GL	gigalitre
m	metre
Mt	Million tonnes
Mtpa	Million tonnes per annum
Mm ³	Million metres
MW	megawatts
Tjpa	Terrajoules per annum

Figures – All previous Figures are replaced by the following:

Figure 1: Development envelope of the Iron Ore Mine, Downstream Processing (Direct-reduced and Hot-briquetted Iron) and Port, Cape Preston, WA.

Figure 2: Dewater discharge pipeline and disposal development envelope.

Tables - Previous delineation coordinates Table is replaced by Table 4

Table 4: Delineation coordinates for Waste Rock Locations 1 – 4, Tailings Storage Facility and mine pits – Map Grid of Australia (MGA) Zone 50 coordinates.

Table 5: Delineation coordinates for dewater discharge pipeline development envelope – Map Grid of Australia (MGA) Zone 50 coordinates.

[Signed 31 August 2016]

Dr Tom Hatton
CHAIRMAN
Environmental Protection Authority
under delegated authority

Approval date: _____
