Dear Russell

Regarding Proposed Desalination Plant – Cape Riche

I have attended a number of presentations in the last 6 months, by the Southdown Project team, discussing the proposed desalination plant at Cape Riche.

From information provided to date, it is clear that the proposed development is expected to protect the qualities which are important to the Wellstead community. I understand there will be no noise, light, or environmental impacts which will affect people's use and enjoyment of the area, and am pleased the Project team has taken community feedback into consideration and made changes to the design of the desalination project.

I, and the Progress Association, look forward to the positive effects of the Southdown Project for the Wellstead community.

Yours truly,

Allan Gilkison
