

APPENDIX E: STAKEHOLDER CONSULTATION REGISTER

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
Traditional Owners					
22 May 2018	Weeli Wolli Creek Co-Management Board (now Weeli Wolli Creek Advisory Committee)	Meeting	ESD	•Introduction to the Project, including scope and proposed timing.	
5 September 2018	KNAC/ Niyaparli Traditional Owners	Niyaparli Heritage Sub-Committee meeting	Draft ERD	•Cultural heritage survey update provided for HD2 and BHT. •Discussion of the deposits and planned heritage work.	
6 September 2018	KNAC/ Niyaparli Traditional Owners	Niyaparli LIC meeting	ESD	•Introduction to the Proposal, including the HD2 and Bedded Hilltop (BHT) deposits and two potential ore transport options (haul and conveyor). •Studies will continue to investigate the most cost-effective way of transporting ore from these deposits. •Proposed first ore dates will depend on ongoing studies work. •KNAC expressed concerns that with BHT coming online, access to Weeli Wolli Creek (WWC) may become blocked. •KNAC requested updates on access to WWC at future LIC meetings.	•KNAC and the Niyaparli people will be kept informed about the progress of the Studies (i.e., new deposits) – particularly through the LIC forum. •The Proponent has committed to maintaining access to WWC - consultation will continue as the project is refined to better define Niyaparli preferred options for access to WWC during construction and operations.
10 October 2018	NAC/ Ngarlawangga Traditional Owners	Ngarlawangga LIC meeting	ESD	•Introduction to the Proposal, including the portion potentially within the Ngarlawangga Native Title determination	
3 April 2019	KNAC/ Niyaparli Traditional Owners	Niyaparli Heritage Sub-Committee meeting		•Cultural heritage survey update provided for HD2 and BHT. •Discussion of the BDH16-03 very significant site and that additional geotechnical assessment will be required if blasting is to occur within 300m of the site. •The cultural values of BDH16-03 were discussed in detail.	•The Proponent has committed to avoiding direct impacts to BDH16-03 and managing the site in-situ.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
4 April 2019	KNAC/ Niyaparli Traditional Owners	Niyaparli LIC meeting	Other	<ul style="list-style-type: none"> •The Order of Magnitude study phase is complete, and the Pre-feasibility stage will commence later in 2019. •HD2 and BHT are within the Niyaparli native title determination and heritage survey work will continue to cover the proposed pits, waste dumps and infrastructure areas. 	
23 September 2019	BNTAC/ Banjima Traditional Owners	Information provision (USB)	Other	<ul style="list-style-type: none"> •Copies of the biological reports undertaken in respect of the Project area, as well as an explanatory memo were provided to BNTAC 	
23 September 2019	BNTAC/ Banjima Traditional Owners	Meeting with BNTAC staff	ESD	<ul style="list-style-type: none"> •Overview of Project, including that HD2 and BHT are on Niyaparli country, but that ore will be processed at the existing plant on Banjima country. •Overview of biological survey outcomes. •Overview of proposed Assessment on Referral Information approval process and timeline for the Project. •The potential interaction of the Proposal with Weeli Wolli Creek is likely to be a concern. •BNTAC requested that information about the Proposal be presented to the Weeli Wolli Creek Advisory Committee. BNTAC are looking at cumulative impacts of mining in the Pilbara. 	<ul style="list-style-type: none"> •The Proponent advised that above water table mining only is proposed so there should be no impact to Weeli Wolli Creek. •It is proposed to build a crossing over Pebble Mouse Creek and modelling will be completed to ensure there are no downstream impacts to Weeli Wolli Creek. •The Proponent confirmed it would present information about the Proposal to the Weeli Wolli Creek Advisory Committee. •The Proponent will provide a copy of the referral to BNTAC at the time of submission to the EPA and will continue to consult with BNTAC. •In early 2021, the proposed approvals process for the Project was amended from an Assessment on Referral Information to a Public Environmental Review. The draft Referral and ESD were provided to KNAC, NAC and BNTAC on 23 April 2021 for review and feedback. The referral was lodged with the EPA in August 2021 and the ESD was lodged with the EPA in January 2022.
25 September 2019	NAC/ Ngarlawangga Traditional Owners	Ngarlawangga LIC meeting	Draft ERD	<ul style="list-style-type: none"> •An overview of the Project scope was provided including that it involves above water table mining only of the HD2 and BHT deposits, external waste dumps, water supply and associated infrastructure, transport of ore (via conveyors or haulage) to HD1 for processing, access tracks and roads, rail crossing. •Noted that the only portion of the Project on Ngarlawangga country is the potential diversion of part of Great Northern Highway to develop the full extent of the HD2 deposits. Ngarlawangga are concerned about the impact of the potential Great Northern Highway diversion on their country and would like more information about the proposed highway alignment footprint. •Discussion of the proposed Assessment on Referral 	<ul style="list-style-type: none"> •The Proponent will provide a copy of the referral to NAC at the time of submission to the EPA and will continue to consult with NAC. •In early 2021, the proposed approvals process for the Proposal was amended from an Assessment on Referral Information to a Public Environmental Review. The draft Referral and ESD were provided to KNAC, NAC and BNTAC on 23 April 2021 for review and feedback. The referral was lodged with the EPA in August 2021 and the ESD was lodged with the EPA in January 2022. The Proponent is continuing to consult with NAC about the Project and potential impacts to Ngarlawangga country. A

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
				Information approvals process and timeline for the Project •Ngarlawangga are interested in a scoping session to define the consultation pathway.	dedicated Social Surroundings consultation process has been jointly developed to support this consultation.
26 September 2019	KNAC/ Nyiyaparli Traditional Owners	Nyiyaparli LIC meeting	Draft ERD	<ul style="list-style-type: none"> •Overview of Project, including that it involves above water table mining only of the HD2 and BHT deposits, external waste dumps, water supply and associated infrastructure, transport of ore (via conveyors or haulage) to HD1 for processing , access tracks and roads, Pebble Mouse creek crossing, rail crossing, and the potential diversion of part of Great Northern Highway onto Ngarlawangga country. • Discussion of the proposed Assessment on Referral Information approval process and timeline for the Project and update on biological survey work and outcomes. •KNAC requested that the referral be provided to for it to review. 	<ul style="list-style-type: none"> •The Proponent will provide the referral and ERD to the group at the time of submission to the EPA and will continue to consult with KNAC. •In early 2021, the proposed approvals process for the Proposal was amended from an Assessment on Referral Information to a Public Environmental Review. The draft Referral and ESD were provided to KNAC, NAC and BNTAC on 23 April 2021 for review and feedback. The referral was lodged with the EPA in August 2021 and the ESD was lodged with the EPA in January 2022.
16 October 2019	KNAC/ Nyiyaparli Traditional Owners	Meeting	Draft ERD	<ul style="list-style-type: none"> •Overview of Proposal and timing, and proposed approvals process and consultation. •Discussion included that the Proposal involves above water table mining only of the HD2 and BHT deposits, and as a result dewatering will not be required. •Discussion of water courses within the Development Envelope, along with known environmental values, including the known MNES. •The Proponent advised that additional biological reports are being prepared and will be provided to KNAC for review. •The Proponent provided an update on the proposed approvals process and timing. •Nyiyaparli raised concerns about maintaining access to sites during construction, operation, and closure (particularly Weeli Wolli Creek) and the importance of protecting water. •Suggestions regarding sharing of information to support social surroundings. •Nyiyaparli keen to undertake additional fieldwork and surveys with the Proponent, especially to identify important plants and bush foods. 	<ul style="list-style-type: none"> •The Proponent has provided biological information and reports to KNAC and access to Weeli Wolli Creek by Traditional Owners has been considered as part of mine planning. •Access to Weeli Wolli Creek by Traditional Owners will be considered as part of mine planning. • Updated maps showing water sources and rock shelters to be provided to KNAC to assist its desktop review of the Proposal. Common names of flora and fauna (and images) to be added to maps ahead of the next consultation. •The Proponent indicated that it is keen to schedule additional surveys and fieldwork with Nyiyaparli people starting in February or March 2020. • In addition to Social Surroundings consultation, Ethnobotanical / Land management consultation has continued into 2022 to inform the ERD.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
12 November 2019	NAC/ Ngarlawangga Traditional Owners	Ngarlawangga Board of Directors meeting	ESD	<ul style="list-style-type: none"> •An overview of the Proposal was provided to the Ngarlawangga Board of Directors, noting that the only portion of the Project on Ngarlawangga country is the potential diversion of part of Great Northern Highway. •An overview of the Proposal scope was provided including that it involves above water table mining only of the HD2 and BHT deposits, external waste dumps, water supply and associated infrastructure, transport of ore (via conveyors or haulage) to HD1 for processing, access tracks and roads, rail crossing, and the potential diversion of part of Great Northern Highway on to Ngarlawangga country. •Discussion of the proposed Assessment on Referral Information approvals process and timeline for the Project. •An overview of the biological survey outcomes to date was also provided. •The Ngarlawangga Board asked if the potential diversion of Great Northern Highway will be surveyed. NAC asked what impact the highway diversion will have on Ghost Bats. 	<ul style="list-style-type: none"> •The Proponent said heritage surveys will be conducted over the area of the potential diversion of the Great Northern Highway, and that it is not currently clear what impact the diversion may have on Ghost Bats, but that it would try to avoid disturbance to the bats where practicable. •The Proponent will provide biological reports to NAC for review and is available to attend further meetings to discuss the Proposal. • The Proponent will continue to consult with NAC in respect of the Proposal.
19 November 2019	BNTAC/ Banjima Traditional Owners	Banjima LIC	Other	<ul style="list-style-type: none"> •An overview of Proposal and biological survey outcomes was presented to the LIC, including that it will involve above water table mining only at HD2 and BHT, permanent external waste dumps, water supply from a small borefield and the transport of ore to HD1 for processing. •Infrastructure required by the Proposal will include a crossing over Pebble Mouse Creek, access tracks and roads, a rail crossing and the potential diversion of part of Great Northern Highway. •Discussion of the proposed Assessment on Referral Information approvals process and timeline for the Proposal. •An overview of the biological survey outcomes to date was also provided. •BNTAC noted that the Proponent presented information about the Proposal to BNTAC previously and this has been shared with the elders. Banjima LIC members noted that HD2 and BHT are on Nyiyaparli country, but the ore will be processed on Banjima country. 	<ul style="list-style-type: none"> •The Proponent provided updated biological reports to BNTAC on 23 September 2020 and 3 March 2021.
24 February 2020	Weeli Wolli Creek Advisory Committee	Weeli Wolli Creek Advisory Committee meeting	Other	<ul style="list-style-type: none"> •Overview of the Proposal and summary of environmental studies to date. •NB - Committee did not meet quorum. •The Committee noted that continued access to Weeli Wolli Creek will be an important consideration, and Traditional Owner consultation will be appreciated. 	<ul style="list-style-type: none"> •The Proponent is continuing to engage with Traditional Owners in respect of the Project and maintaining access to Weeli Wolli Creek, including via LICs and other forums.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
16 April 2020	KNAC, BNTAC, NAC	Information provision (Email)	Other	<ul style="list-style-type: none"> The Proponent provided an explanatory memo and copies of the updated biological reports. 	
1 July 2020	KNAC/ Nyiyaparli Traditional Owners	Nyiyaparli Executive Committee meeting	Draft ERD	<ul style="list-style-type: none"> Overview of the Proposal and summary of the approvals process. 	
19 August 2020	NAC/ Ngarlawangga Traditional Owners	Ngarlawangga LIC meeting	ESD	<ul style="list-style-type: none"> Overview of the Proposal scope including that it involves above water table mining only of the HD2 and BHT deposits, external waste dumps, water supply and associated infrastructure, transport of ore (via conveyors or haulage) to HD1 for processing, access tracks and roads, rail crossing, and the potential diversion of part of Great Northern Highway on to Ngarlawangga country. New crossings of Pebble Mouse Creek will be required to transport ore to HD1. Overview of biological surveys completed to date and outcomes and initial visual impact assessment work. Discussion of the Social Surroundings consultation sought with Ngarlawangga. Discussion of the approvals process. Request for more information about Ghost Bats. Copies of additional biological reports to be provided to NAC. 	<ul style="list-style-type: none"> The Proponent is happy to meet with NAC and provide additional information about Ghost Bats. Additional biological reports were provided to NAC on 9 October 2020.
21 August 2020	KNAC/ Nyiyaparli Traditional Owners	Teleconference with KNAC staff	Draft ERD	<ul style="list-style-type: none"> Overview of the Project and approvals process and timing. Discussion of the Social Surroundings consultation sought with Nyiyaparli. 	
17 September 2020	BNTAC/ Banjima Traditional Owners	Meeting with BNTAC staff	Draft ERD	<ul style="list-style-type: none"> Overview of the Project and approvals process and timing. Update on biological reports. Discussion of the Social Surroundings consultation sought with Banjima. BNTAC noted that ore will be processed on Banjima country and that Banjima should be compensated for this impact. BNTAC asked for more information about water use at HD1 and that water will be a focus for Banjima in future consultation. BNTAC also asked if traffic will increase in frequency. 	<ul style="list-style-type: none"> The Proponent and BNTAC have agreed an approach for further discussions about compensation. Information about water use at HD1 was provided to BNTAC as part of environmental reports provided on 29 March 03, 2021, and 29 June 2021. The Proponent advised that the process rate will be like now so traffic will be about the same frequency.
23 September 2020	BNTAC/ Banjima Traditional Owners	Information provision (USB)		<ul style="list-style-type: none"> Additional biological reports and explanatory memos provided 	

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
25 September 2020	NAC/ Ngarlawangga Traditional Owners	Meeting with NAC staff and representatives to plan pre-fieldwork meeting	Other	<ul style="list-style-type: none"> •Discussion and planning of Social Surroundings consultation sought and proposed timing. •Planning of pre-fieldwork meeting held on 9 October 2020. •This will be a collaborative approach to capture information for the Proponent to feed into the mine design and approval but also to make sure Ngarlawangga capture the information and knowledge for the group. 	<ul style="list-style-type: none"> •The Proponent is continuing to work with Ngarlawangga to develop social surroundings consultation approach and capture relevant information.
1 October 2020	KNAC/ Nyiyaparli Traditional Owners	Nyiyaparli LIC meeting	Draft ERD	<ul style="list-style-type: none"> •Overview of the Proposal and approvals process and timing. Information on the HD2 Project, closure strategy and objectives. •Discussion of the proposed Social Surroundings consultation to feed into the approvals process. •The Proponent is seeking Nyiyaparli feedback to include in the Proposal design and the approvals process and would like to get feedback on the ore transport options (haul road or conveyor) and location of the proposed Pebble Mouse Creek crossing. •Initial information about the closure planning process. •Protecting water and heritage sites and places is important - especially Weeli Wolli Creek and maintaining the flow of Pebble Mouse Creek. Free and safe access to Weeli Wolli Creek needs to be considered in planning. •The proposed waste rock landform near Weeli Wolli Creek is too close. Impacts to water and cumulative impacts to water are a concern. •Nyiyaparli requested the Proponent work with other mining companies in the area on a combined water management approach. •Nyiyaparli want to be involved in environmental surveys and monitoring work. Nyiyaparli ladies and their plant knowledge should also be included in survey work (both environmental surveys and ethnobotanical surveys). • Nyiyaparli want to be consulted about closure of the Project, and an opportunity to explain to the Proponent what they would like. 	<ul style="list-style-type: none"> •Feedback included in ongoing Proposal revision work, and to inform ongoing consultation. •The waste rock landform south of the HD2 pit was removed in subsequent mine designs and access to Weeli Wolli Creek will be maintained as part of the Project design. •Access to Weeli Wolli Creek will also be supported during construction of the Project. •The Proponent is developing a framework to work with BHP on water management. Ethnobotanical work with Nyiyaparli has commenced and will continue. •Closure consultation is ongoing as the project design is refined and developed.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
2 October 2020	KNAC/ Nyiyaparli Traditional Owners	Social Surroundings pre-fieldwork workshop		<ul style="list-style-type: none"> •Whole-day workshop with KNAC staff and representatives and Nyiyaparli Traditional Owners. •Discussion of the approvals process and timing and what 'Social Surroundings' is, including key social and cultural values in the Proposal area. •Discussion of the Proposal scope and timing, including surface and ground water and water supply options, proposed Pebble Mouse Creek crossings, and the proposed surface water diversion near the proposed HD2 pit. •Discussion of initial closure planning and outcomes and heritage survey work to date. •Scoping for the first in-field consultation planned for late October 2020. •Key issues raised by the Nyiyaparli Traditional Owners to be considered in the Proposal design and discussed further included impacts to waterways and water flows, water use and management, increased dust and noise, impacts to heritage sites, access to country, ground disturbance and other impacts to country, closure and rehabilitation (including opportunities to backfill), Nyiyaparli involvement in environmental and other monitoring and business development and employment opportunities. •Meeting feedback also captured in the first Social Surroundings Short Report (provided in December 2020) 	<ul style="list-style-type: none"> •Feedback considered and incorporated into the draft referral where relevant.
2 October 2020	KNAC/ Nyiyaparli Traditional Owners	Information provision (USB)		<ul style="list-style-type: none"> •Additional biological reports and explanatory memos provided to KNAC 	
9 October 2020	NAC/ Ngarlawangga Traditional Owners	Information provision (USB)		<ul style="list-style-type: none"> •Additional biological reports and explanatory memos provided to NAC 	
9 October 2020	NAC/ Ngarlawangga Traditional Owners	Social Surroundings pre-fieldwork workshop		<ul style="list-style-type: none"> •Whole-day workshop with NAC staff and representatives and Ngarlawangga Traditional Owners to discuss two Projects, including the HD2 Proposal. •Discussion of the approvals process and timing and what 'Social Surroundings' is. •Discussion of the Proposal scope and timing, including above water table mining of HD2 and BHT, ore transport infrastructure, proposed Pebble Mouse Creek crossings, water supply options and the potential realignment of part of Great Northern Highway. •Discussion of visual impacts from Ngarlawangga country and the biological survey work completed to date. 	<ul style="list-style-type: none"> •Feedback from Ngarlawangga will be included in the mine design and approval. •In field consultation will be undertaken to visit the Project area and better understand important values and potential impacts to help guide work to avoid, reduce or manage impacts. •Pebble Mouse Creek crossings will be designed to allow water to flow through. Understanding what areas Ngarlawangga want to access will help options to be developed.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
				<ul style="list-style-type: none"> •Water is a main concern for Ngarlawangga, including impacts to waterways and waterholes and the animals that rely on waterholes. •Ngarlawangga would like more information about the Pebble Mouse Creek crossings. Dust, access to country and support for Ngarlawangga to access country are also important. 	
22 October 2020	BNTAC/ Banjima Traditional Owners	Banjima LIC meeting	Draft ERD	<ul style="list-style-type: none"> •Update on the Proposal and scope, including that it involves above water table mining at HD2 and BHT, infrastructure for processing and transporting ore (via conveyors or haulage) to HD1, external waste rock landforms and stockpiles, potential realignment of part of Great Northern Highway, water supply (groundwater abstraction and / or existing HD1 dewatering water that is discharged via the gabion) •The Proposal will also include new Pebble Mouse Creek crossings for the haul road/conveyor, and potential new mine access road and realignment of Great Northern Highway. •Discussion of approvals process and timing, Social Surroundings consultation and the consultation sought with Banjima. •Discussion of the impacts on Pebble Mouse Creek and the cost of water from Weeli Wolli Creek versus Baby Hope. 	<ul style="list-style-type: none"> •The Proponent will seek to ensure maintenance of Pebble Mouse Creek flows and prevent the banking-up of water upstream of crossings. •Water supply will be needed for the Proposal and several options are being investigated e.g., ground water at Baby Hope or using some of the water from dewatering at HD1 which would otherwise be discharged to Weeli Wolli Creek. •The Proponent is keen to receive feedback on the options. In looking at water supply options, the Proponent will take into consideration the impact of using that option and then the costs.
22 October 2020	KNAC/ Nyiyaparli Traditional Owners	First Social Surroundings in-field consultation	Draft ERD	<ul style="list-style-type: none"> •1.5 day in-field consultation with KNAC staff and representatives and Nyiyaparli Traditional Owners to visit areas within the Proposal and to discuss the Proposal in more detail. •Topics discussed included the importance of water, water use and management and water quality (diversions, discharge, drawdown, dust control), concerns about impacts of dust on country (particularly accumulation in water features/drainage), amenity, impacts to people and animals. •Discussed that access to country needs to be easy and not restricted by permit systems, fences, gates etc. More consultation is required to discuss closure planning. •Request that the Proponent investigate moving the proposed waste rock landform south of the HD2 pit further away from Weeli Wolli Creek. •Request for additional information and consultation about the size of the proposed pits and waste rock landforms, water use and management, expected dust levels and management, plant and animal studies in the Project area, closure planning, opportunities for Nyiyaparli involvement in on ground monitoring and management work and business development opportunities. • Short report from trip received 15 December 2020. 	<ul style="list-style-type: none"> •Feedback and recommendations included in planning future in-field consultation. • Waste rock landform south of the HD2 pit removed in subsequent mine design updates.

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
9 December 2020	NAC/ Ngarlawangga Traditional Owners	Social Surroundings pre-fieldwork workshop	Draft ERD	<ul style="list-style-type: none"> •1.5-day workshop with NAC staff and representatives and Ngarlawangga Traditional Owners to discuss what Social Surroundings is, and to scope the first Social Surroundings field trip planned for early 2021 relating to 2 Projects, including the HD2 Proposal. •Joint planning of the first Social Surroundings field trip planned for early 2021. •Key concerns include protecting access to country, protecting animals and animal habitats, protecting water flows and waterways, water use and management, impacts to heritage sites, dust and visual impacts to country, rehabilitation of country after mining 	<ul style="list-style-type: none"> •Feedback included in jointly planning the first in-field consultation with Ngarlawangga which was held in April 2021.
16 December 2020	KNAC/ Nyiyaparli Traditional Owners	Email	Draft ERD	<ul style="list-style-type: none"> •Short report from first Social Surroundings field trip provided by KNAC to the Proponent 	<ul style="list-style-type: none"> •The Proponent is continuing to work with Nyiyaparli to joint plan future consultations including social surroundings and heritage surveys. •Recommendations have been considered in the draft ERD.
27 January 2021	BNTAC/ Banjima Traditional Owners	Meeting with BNTAC staff		<ul style="list-style-type: none"> •Meeting with BNTAC staff to discuss the Project, Social Surroundings consultation sought with Banjima Traditional Owners and approvals process and timing. •Discussion of the Proposal scope, including that it involves above water table mining at HD2 and BHT, infrastructure for processing and transporting ore (via conveyors or haulage) to HD1, external waste rock landforms and stockpiles, potential realignment of part of Great Northern Highway, water supply (groundwater abstraction and / or existing HD1 dewatering water that is discharged via the gabion). •The Project will also include new Pebble Mouse Creek crossings for the haul road/conveyor, and potential new mine access road and realignment of Great Northern Highway. • Discussion of biological survey work undertaken to date. •BNTAC has provided the biological survey reports to their consultant to review. BNTAC requested spatial data for the biological surveys. 	<ul style="list-style-type: none"> •Project and biological survey spatial data provided on 8 July 2021.
3 March 2021	BNTAC/ Banjima Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Updated biological reports provided to BNTAC and its consultant. 	

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
11 March 2021	BNTAC/ Banjima Traditional Owners	Banjima LIC/LoMP meeting	Draft ERD	<ul style="list-style-type: none"> •Update on the Proposal scope, including that it involves above water table mining at HD2 and BHT, infrastructure for processing and transporting ore (via conveyors or haulage) to HD1, external waste rock landforms and stockpiles, potential realignment of part of Great Northern Highway, water supply (groundwater abstraction and / or existing HD1 dewatering water that is discharged via the gabion). •The Proposal will also include new Pebble Mouse Creek crossings for the haul road/conveyor, and potential new mine access road and realignment of Great Northern Highway. •Discussion of biological survey work undertaken to date. •Discussion of approvals process and timing, Social Surroundings consultation and the consultation sought with Banjima. •BNTAC requested more information on how deep and wide the pits will be. •Discussion on the Pebble Mouse Creek crossing and any disruption to the creek as well as dust and other impacts. •Discussion on the waste rock landform south of the HD2 pit and near Weeli Wolli Creek and the potential for it to be removed Discussion on the potential to reduce the Development Envelope and the importance of Visual impact assessment. •Concerns about lack of compensation to Banjima for impacts to country. 	<ul style="list-style-type: none"> •The Proponent advised that the Pebble Mouse Creek crossings will be designed to allow water to flow through. • The Proponent will do more work to understand potential dust creation and how to reduce it. •The waste rock landform south of the HD2 pit near Weeli Wolli Creek was removed in subsequent mine designs, and the Development Envelope has been reduced in a number of areas as project planning has refined the footprint. • A process to support discussions about compensation to Banjima was agreed around mid-2021.
18 March 2021	NAC/ Ngarlawangga Traditional Owners	Ngarlawangga LIC meeting	Draft ERD	<ul style="list-style-type: none"> •Update on the Project, that at this stage, there is a conceptual footprint. •The Proponent will consult with NAC and Ngarlawangga further in the next few months before the approvals process commences. •The Proponent is seeking Ngarlawangga involvement in Social Surroundings consultation. 	<ul style="list-style-type: none"> •The Proponent and Ngarlawangga commenced first social surroundings trip on 8 April 2021.
29 March 2021	BNTAC/ Banjima Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Additional environmental reports provided to BNTAC and its consultant. 	

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
8 April 2021	NAC/ Ngarlawangga Traditional Owners	First Social Surroundings in-field consultation	Draft ERD	<ul style="list-style-type: none"> •3 day in-field consultation with NAC staff and representatives and Ngarlawangga Traditional Owners to visit areas within the Proposal's Development Envelope to discuss the Proposal in more detail. •This was a combined trip for 2 projects with only a small amount of time spent discussing the HD2 Proposal. •Topics discussed included the importance of water, and maintaining water flows, potential Pebble Mouse Creek crossings, concerns about dust creation, impact to country, impacts to people and animals. •Discussed biological survey work to date and that greater access to Country is desired •Key issues raised include impacts to water (including water abstraction, water flows and dust in waterways and waterholes), impacts to cultural heritage, Country, plants and animals and access, changes to the landscape and aesthetic values of Country. • Concerns about current and increased traffic on Great Northern Highway, and impacts the potential new bridge may have on water flows and existing water pools along Pebble Mouse Creek. •Request for ongoing consultation, including about the proposed Project footprint, cultural values mapping and Traditional Ecological Knowledge surveys, additional visual and sound modelling of the proposed Great Northern Highway realignment. Request for further consultation about closure planning and rehabilitation. Final Report finalised in July 2021. 	<ul style="list-style-type: none"> •Report referenced and key feedback included in the Social Surroundings chapter.
23 April 2021	KNAC, BNTAC, NAC	Information provision (email and hard copy)	ESD	<ul style="list-style-type: none"> •Draft Referrals and draft ESD provided to Traditional Owner groups for review and feedback. 	<ul style="list-style-type: none"> •Traditional Owner responses captured in the Social Surrounds chapter of the ERD
8 June 2021	NAC/ Ngarlawangga Traditional Owners	Information provision (email)	Draft ERD	<ul style="list-style-type: none"> •NAC provided draft Phase 1 SS report to the Proponent 	
29 June 2021	BNTAC/ Banjima Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Additional environmental reports provided to BNTAC and its consultant. 	
5 July 2021	KNAC/ Nyiyaparli Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Updated biological reports provided to KNAC. 	

Start date	Stakeholder	Consultation type/forum	Consultation stage	Summary of discussions relevant to the project	Response/action items
7 July 2021	KNAC/ Niyaparli Traditional Owners	Niyaparli LIC meeting	Draft ERD	<ul style="list-style-type: none"> •Update on Project, discussion of Part IV process and timing, Social Surroundings and consultation to date and ongoing work/changes to project in response. •Niyaparli feedback sought in relation to ore transport options and Project design. 	
8 July 2021	BNTAC/ Banjima Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Spatial data files for updated biological surveys provided. 	
21 July 2021	BNTAC/ Banjima Traditional Owners	Banjima LOMP meeting	Draft ERD	<ul style="list-style-type: none"> •Brief discussion that the Proposal requires Social Surroundings consultation, and that the draft Referral and ESD for the Proposal has been provided to BNTAC and its consultant for review and feedback. • A dedicated Social Surroundings workshop is to be held for the Proposal to develop the consultation process and plan the consultation. 	<ul style="list-style-type: none"> •Dates confirmed for first Social Surroundings in-field consultation, and confirmation of scope of work for trip discussed on 15 December 2021
22 July 2021	KNAC/ Niyaparli Traditional Owners	Niyaparli Social Surroundings workshop	Draft ERD	<ul style="list-style-type: none"> •2-day workshop. •Update on the Project and changes to the mine design based on feedback to date. Discussion of Part IV process and timing, Social Surroundings consultation to date and planned future consultation. •Discussion of approvals process, draft Referral and ESD •Discussion of key Social Surroundings issues including water, dust, restricted access to country, impacts to heritage sites, interfering with caring for country, increased opportunities to take part in on-groundwork to monitor and manage country. •Need to protect Weeli Wolli Creek, including reducing or removing the waste rock landform near it. 	<ul style="list-style-type: none"> •Feedback included in ongoing mine design work. Feedback also included in Short Report for this workshop and the August Social Surrounding in-field consultation which was provided in November 2021
23 July 2021	BNTAC/ Banjima Traditional Owners	Information provision (email)	Other	<ul style="list-style-type: none"> •Peer review report prepared on behalf of BNTAC provided to the Proponent. •Feedback provided in respect of biological survey and other studies undertaken to date and additional work required to meet EPA guidance. 	<ul style="list-style-type: none"> •Project design is continuing to be refined and additional biological survey and other studies will be undertaken to address any gaps in initial survey coverage and the coverage required for the refined project design. •Some changes were made to the draft Referral in response to this report.
