

**FI Joint-Venture Pty Ltd**  
Yogi - Magnetite Project  
Yogi Western Pipeline Desktop Assessment

April 2020

# Executive summary

FI Joint Venture (FIJV) proposes to construct and operate a magnetite iron ore project located approximately 250 kilometres (km) east-northeast of Geraldton and 15 km northeast of Yalgoo in the Mid-West, Western Australia (WA). The Yogi Magnetite Mine project (the Proposal) will also require the construction of a magnetite slurry pipeline, a water pipeline from the mine site to Geraldton Port, a return water pipeline, and a gas supply pipeline from the Dampier to Bunbury Natural Gas (DBNG) Pipeline network.

GHD Pty Ltd (GHD) was commissioned by FIJV to undertake a desktop assessment of the western portion of the pipeline development envelope. This desktop assessment will be used to inform the environmental assessment and approvals process.

The Pipeline Development Envelope (PDE) encompasses the western portion of the total proposed pipeline area and broadly follows the Mt Magnet Road extending from the Geraldton port eastwards to Pindar. The study area was defined for the desktop assessment based searches and includes a 40 km buffer of the PDE.

Database searches identified two federally listed TECs potentially occurring within the study area: Subtropical and Temperate Coastal Saltmarsh, and Eucalypt Woodlands of the Western Australian Wheatbelt (DAWE 2020). The DBCA TEC and PEC database search identified an additional two PECs and/or their buffers occurring within the study area: Plant assemblages of the Moresby Range system and Coastal sands dominated by *Acacia rostelliflora*, *Eucalyptus oraria* and *Eucalyptus obtusiflora* (Geraldton area). No TECs/PECs intersect the PDE.

The *NatureMap* database identified 1964 flora species, representing 152 families as occurring within the study area. This total comprises 1781 native flora species, and 183 naturalised (non-native) flora species. Desktop searches of the EPBC Act PMST, *NatureMap*, DBCA TPFL and WAHERB databases identified the presence/potential presence of 193 conservation significant flora species within the study area. Likelihood assessments identified 85 flora taxa considered 'Likely' to occur within the PDE.

The *NatureMap* database identified 643 fauna species recorded within the study area. This total included 264 birds, 237 invertebrates, 34 mammals, 96 reptiles, and 12 amphibian species. Searches of the EPBC Act PMST (DAWE 2018), DBCA Threatened and Priority Fauna database and *NatureMap* database (DBCA 2007–) identified the presence/potential presence of 47 conservation significant fauna species. Likelihood assessments indicated that there are 12 fauna taxa 'Known' (previously recorded) to occur within the PDE.

No wetlands (RAMSAR or of National importance), DBCA managed lands or Environmentally Sensitive Areas intersect the PDE.

# **1. Introduction**

## **1.1 Project background**

FI Joint Venture (FIJV) proposes to construct and operate a magnetite iron ore project located approximately 250 kilometres (km) east-northeast of Geraldton and 15 km northeast of Yalgoo in the Mid-West, Western Australia (WA). The Yogi Magnetite Mine project (the Proposal) will also require the construction of a magnetite slurry pipeline, a water pipeline from the mine site to Geraldton Port, a return water pipeline, and a gas supply pipeline from the Dampier to Bunbury Natural Gas (DBNG) Pipeline network.

## **1.2 Purpose of this report**

GHD Pty Ltd (GHD) was commissioned by FIJV to undertake the environmental approvals for the Proposal. Previously, GHD conducted a reconnaissance flora and vegetation study and a Level 1 fauna study of the western portion of the Pipeline Development Envelope (PDE). To support environmental approvals for the Project, GHD has also completed flora, vegetation and fauna assessments of the Mine Development Envelope (MDE) (GHD 2019a & GHD 2019b). Following preliminary comments from the Environmental Protection Authority (EPA), GHD has undertaken an additional ecological desktop assessment for the western portion of the PDE. The purpose of this assessment is to identify key flora, vegetation and fauna values in the western portion of the PDE. The outcome of the desktop assessment will be used to inform the environmental assessment and approvals process.

## **1.3 Project location**

### **1.3.1 Pipeline Development Envelope**

The PDE encompasses the western portion of the total proposed pipeline area and broadly follows the Mt Magnet Road extending from the Geraldton port eastwards for 145 km to the locality of Pindar. The PDE is presented in Figure 1, Appendix A.

### **1.3.2 Study area**

The study area was defined for the desktop assessment-based searches and includes a 40 km buffer of the PDE.

## **1.4 Scope of works**

The scope of works was to:

- undertake a desktop review of publicly available information and databases, to determine the flora and fauna values of the study area,
- prepare a technical report that documents the results of the desktop assessment, including mapping.

## **1.5 Relevant legislation, conservation code and background information**

In WA some ecological communities, flora and fauna are protected under both Federal and State Government legislation. In addition, regulatory authorities also provide a range of guidance and information on expected standards and protocols for environmental studies.

Key Commonwealth and WA environmental legislation that may be relevant to the Project is outlined in Table 1.

**Table 1 Key legislation relevant to the project**

Legislation	Responsible agency	Aspect
<b>Commonwealth legislation</b>		
<i>Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act)</i>	Department of Agriculture, Water and the Environment (DAWE)	Matters of National Environmental Significance (MNES) including threatened communities, flora and fauna
<b>State legislation</b>		
<i>Biodiversity Conservation Act 2016</i>	Department of Biodiversity Conservation and Attractions (DBCA)	Conservation and protection of biodiversity and biodiversity components
<i>Biosecurity and Agricultural Management Act 2007</i>	Department of Primary Industries and Regional Development (DPIRD)	Weeds and feral animals
<i>Conservation and Land Management Act 1984</i>	DBCA	Use, protection and management of public lands and waters and its flora and fauna
<i>Environmental Protection Act 1986</i>	Environmental Protection Authority (EPA) (Part IV) Department of Water and Environmental Regulation (DWER) (Part V)	Environmental impact assessment and management
<i>Environmental Protection (Clearing of Native Vegetation) Regulations 2004</i>	DWER	Clearing of native vegetation
<i>Rights in Water and Irrigation Act 1914 (RIWI Act)</i>	DWER	Access to and use of water resources, protection and management of river flows and drainage
<i>Soil and Land Conservation Act 1945</i>	DPIRD	Protection of soil and prevention/management of soil erosion
<i>Wildlife Conservation Act 1950</i>	DBCA	Protection of native wildlife

An overview of key legislation and guidelines, conservation codes and background information relevant to this desktop study is provided in Appendix B.

## 1.6 Limitations

This report has been prepared by GHD for FIJV and may only be used and relied on by FIJV for the purpose agreed between GHD and the FIJV as set out in section 1.2 of this report.

GHD otherwise disclaims responsibility to any person other than FIJV arising in connection with this report. GHD also excludes implied warranties and conditions, to the extent legally permissible.

The services undertaken by GHD in connection with preparing this report were limited to those specifically detailed in the report and are subject to the scope limitations set out in the report.

The opinions, conclusions and any recommendations in this report are based on conditions encountered and information reviewed at the date of preparation of the report (including species listings). GHD has no responsibility or obligation to update this report to account for events or changes occurring subsequent to the date that the report was prepared.

The opinions, conclusions and any recommendations in this report are based on assumptions made by GHD described in this report. GHD disclaims liability arising from any of the assumptions being incorrect.

GHD has prepared this report on the basis of information provided by FIJV and others who provided information to GHD (including Government authorities), which GHD has not independently verified or checked beyond the agreed scope of work. GHD does not accept liability in connection with such unverified information, including errors and omissions in the report which were caused by errors or omissions in that information.

The opinions, conclusions and any recommendations in this report are based on information obtained from specific sample points. Site conditions at other parts of the site may be different from the site conditions found at the specific sample points.

Investigations undertaken in respect of this report are constrained by the particular site conditions, such as the location of access tracks, operational works, services and vegetation. As a result, not all relevant site features and conditions may have been identified in this report.

Site conditions may change after the date of this report. GHD does not accept responsibility arising from, or in connection with, any change to the site conditions. GHD is also not responsible for updating this report if the site conditions change.

This report has assessed the flora and fauna within the study area (Figure 1, Appendix A). Should the study area change or be refined, further assessment may be required.

### **1.6.1 Desktop limitations**

The DAWE EPBC Act PMST is based on bioclimatic modelling for the potential presence of species. As such, this does not represent actual records of the species within the area. The records from the *NatureMap* searches of threatened flora and fauna provide more accurate information for the general area. However, some records of collections, sightings or trappings cannot be dated and often misrepresent the current range of threatened species.

## 2. Methodology

A desktop assessment of the study area was undertaken to identify environmental constraints. The assessment involved the review of publicly available spatial datasets (sourced from Government of Western Australia (GoWA)), publications and government managed databases. The information sources utilised in this assessment are presented in Table 2.

**Table 2 Information sources**

Aspect	Information Source
Climate	Bureau of Meteorology Climate Data Online (BoM 2020)

Matters of National Environmental Significance	Department of the Agriculture, Water and the Environment (DAWE) Protected Matters Search Tool (PMST) (DAWE 2015)

## **2.1 Limitations**

### **2.1.1 Desktop limitations**

Desktop investigations use a variety of online resources such as the DBCA searches, NatureMap database and the EPBC Act PMST. The responsibility for the accuracy of such data remains with the issuing authority, not with GHD.

The EPBC Act PMST is based on bioclimatic modelling for the potential presence of species. As such, this does not represent actual records of the species within the area. The records from the DBCA searches and NatureMap database provide more accurate information for the general area. However, some records of collections, sightings or trappings cannot be dated or have plain language locality descriptions and may misrepresent the current range of a species.

The EPA technical guidance recommend flora and fauna study reports for environmental impact assessment in WA should contain a section describing the limitations of the study Appendix B. Based on this assessment, the present study effort has not been subject to any constraints which affect the thoroughness of the assessment and the conclusions which have been formed.

### 3. Desktop assessment

#### 3.1 Climate

The climate of the study area is classified as desert to semi-desert warm Mediterranean with a bimodal (summer and winter) rainfall pattern (Beard 1976). Rainfall is moderately variable, with rainfall events being restricted to local areas rather than being widespread. The majority of all rainfall received occurs during winter months and is a result of low pressure system associated with the westerly wind system. Summer rainfall occurs as result of thunderstorms and heavy downpours associated with remnant tropical cyclones. The BoM Mullewa station (site number 008095) is the nearest weather station to the study area with reliable long-term data. Climatic data from this site indicates:

- Mean maximum temperature ranges from 18.8 °C in July to 36.8 °C in January
- Mean minimum temperature ranges from 7.0 °C in July to 20.2 °C in February
- Mean annual rainfall of 333.7 mm with an average of 43.9 rain days per year (BoM 2019).

Climatic data from this site including the long-term average, and from 2018 is summarised in Plate 1.

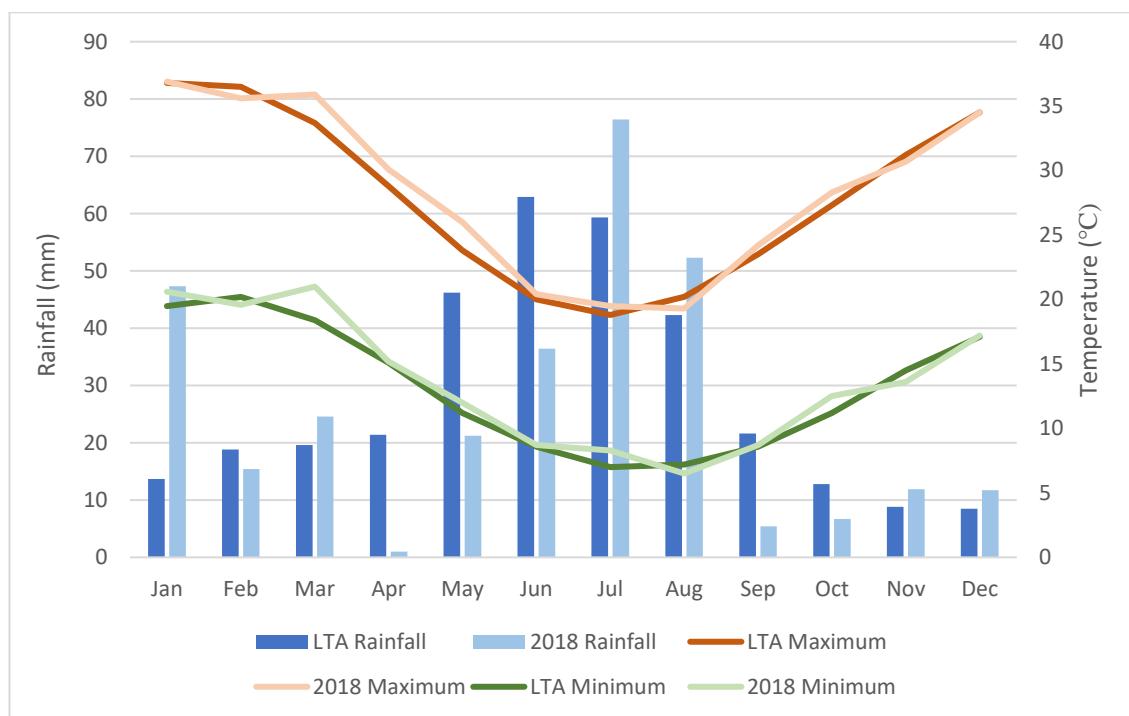

Plate 1 Climatic data for Mullewa (BoM 2019)

#### 3.2 Regional biogeography

The study area is located within the Interim Biogeographic Regionalisation of Australia (IBRA) bioregions of Yalgoo (YAL), Avon Wheatbelt (AVW) and Geraldton Sandplains (GES) and subregions of subregions Tallerling, Merredin and Geraldton Hills respectively (DAWE 2018).

The Tallerling subregion is characterised by low woodlands to open woodlands of *Eucalyptus*, *Acacia* and *Callitris* on red sandy plains of the Western Yilgarn Craton and Southern Carnarvon Basin. The Western Yilgarn Craton comprises mulga, *Callitris-E. salubris*, and Bowgada open woodlands and scrubs on earth to sandy-earth plains. The Southern Carnarvon Basin has a

basement of Phanerozoic sediments. The subregion is particularly rich in ephemerals (Desmond and Chant 2001).

The Merredin subregion is characterised by drainage dissecting a tertiary plateau in Yilgarn Craton within a gently undulating landscape of low relief. Proteaceous heath scrub is rich with endemics, on residual lateritic uplands and derived sandplains; mixed eucalypt, *Allocasuarina huegeliana* and Jam-York Gum woodlands on Quaternary alluvial flats. Within this subregion is the ancient peneplain with low relief, gently undulating landscape. There is no connected drainage; salt lake chains occur as remnants of ancient drainage systems that now only function in very wet years. Lateritic uplands are dominated by yellow sandplain (Beechman 2001).

The Geraldton Hills subregion is characterised by mainly proteaceous scrub-heaths, rich in endemics, on the sandy earths of an extensive, undulating, and lateritic sandplain mantling Permian to Cretaceous strata. Extensive York Gum and Jam woodlands occur on outwash plains associated drainage. The Geraldton Hills subregion (GS2) incorporates the southern end of Carnarvon Basin and northern end of the Perth Basin, with exposed areas of Permian/Silurian siltstone and Jurassic sandstones, mostly overlain by sandplains, alluvial plains, and coastal limestone. Sand heaths with emergent *Banksia* and *Actinostrobus*, York Gum woodlands on alluvial plains, proteaceous heath and *Acacia* scrubs on limestone depending on depth of coastal-sand mantle, low closed forest of *Acacia rostellifera* (now cleared) on alluvial plains of Greenough and Irwin River (behind beach dune system south of Geraldton) (Desmond *et al* 2001).

### **3.3 Landforms and soils**

The study area intersects six soil landscape zones including:

- Irwin River Zone: The Irwin and Lockier River catchments within the Yilgarn Craton. Archaean granites, gneisses, metasediments and basic igneous rocks.
- Geraldton Coastal Zone: Dunes with alluvial plains and sand sheets. Low hills of Pleistocene Tamala Limestone, Recent calcareous and siliceous dunes.
- Arrowsmith Zone: Dissected lateritic sandplain on Cretaceous and Jurassic sediments. Bounded in the east by the Dandaragan Scarp and in the south and west by the Gingin Scarp. Sandy and gravelly soils formed in colluvium and rock weathered in situ.
- Tenindewa Zone: Sandplains and relict hardpan wash plains on Permian and Carboniferous sedimentary rocks of the Perth Basin with Yellow deep sands, Red-brown hardpan shallow loams and some Yellow sandy earths and Red sandy earths.
- Chapman Zone: Mesas of Triassic and Jurassic sediments on undulating Proterozoic granulite and migmatite with numerous dolerite dykes. Soils formed in rock weathered in-situ, and lateritic colluvium on the sedimentary rocks (mesas).
- Southern Victoria Sandplain Zone: Gently undulating, weakly dissected sandplain formed mainly on in-situ weathered Yarragadee sandstone and alluvium.

### 3.4 Land systems

The study area is situated in the agriculture zone of Western Australia. The Department of Primary Industries, Resources and Development (DPIRD) have previously mapped soil landscapes for the far western portion extent of the study area, and found 21 soil landscape systems intersect the western part of the study area (Table 3).

**Table 3 Soil landscape systems**

Soil landscapes	Description
Tamala South System	Rises and low hills with relict dunes and some limestone outcrop on coastal limestone north of Jurien Bay. Yellow deep sands common, with yellow/brown shallow sands and calcareous shallow and deep sands. Banksia woodlands and heathlands
Sugarloaf System	Undulating to rolling rises with narrow valleys and an integrated drainage pattern.
Greenough Alluvium System	Level alluvial plain with areas of minor terracing
Quindalup Central System	Coastal dune system, including foredunes, beach ridge plains, parabolic dunes, deflation basins and flats. No fixed drainage. Calcareous deep and shallow sands. Coastal heathlands and scrub.
Moresby System	Flat topped ranges and isolated mesas.
Greenough System	River beds, terraces and alluvial flats, includes dissected margins of relic alluvial plains.
Chapman Tamala system	Rises and low hills with relict dunes and some limestone outcrop on coastal limestone north of Jurien Bay. Yellow deep sands common, with yellow/brown shallow sands and calcareous shallow and deep sands. Banksia woodlands and heathlands
Northampton System	Narrow valleys with gently undulating to rolling rises and low hills with an integrated drainage system.
Pindar System	Gently undulating sandplain with long gentle slopes.
Noolagabbi System	Extensive level flats to very gently inclined slopes in broad valleys. Associated drainage networks are often saline.
Binnu East System	Gently undulating sandplain with numerous dune ridges. Alluvial valley slopes and sandplain remnants underlain by Permian sediments. Yellow deep sand and sandplain soils.
Mount Horner System	Long gentle slopes broken by low gravel ridges and broad open depressions. Some lateritic breakaways with spillway sands.
Eradu System	Level to gently undulating sandplain. Drainage lines absent with a few soaks. Permian and Mesozoic sediments mainly formed insitu. Yellow deep sand and sandy earth.
Casuarina System	Level to gently undulating sandplain; Yellow deep sand and sand over gravel, some pale deep sands, yellow sandy earths and sandy gravels
Dartmoor System	Undulating plain with crests, slopes, dunes and drainage lines. Weathered Permean sediments. Red-brown hardpan shallow loam and red earths, loams, sands and duplexes.

Soil landscapes	Description
Mullewa System	Dissected undulating terrain with rocky hill crests, gentle slopes and numerous drainage lines.
Mt Horner North System	Lateritic breakaways and long gentle slopes broken by low gravel ridges and broad open depressions
Fegan System	Gently undulating low rises and hillcrests of broad mature valleys, in upper Irwin River catchment.
Indar System	Gently inclined to undulating slopes on upland surfaces with low laterite breakaways.
Casuarina West System	Level to gently undulating sandplain; Yellow deep sand and sand over gravel, some pale deep sands, yellow sandy earths and sandy gravels

### 3.1 Land use

#### 3.1.1 DBCA managed lands

No DBCA managed lands are located within the study area. One nature reserve occurs approximately 0.5 km from the study area; Eradu Nature Reserve (R 2070 Class A). This is located approximately 6 km south-east of Wicherina (Figure 2, Appendix A).

#### 3.1.2 Environmentally Sensitive Areas

No Environmentally Sensitive Areas (ESA) occur within the study area (Figure 2, Appendix A).

### 3.2 Hydrology

The hydrology data layers indicate the project area intersects five areas proclaimed under the RIWI Act (Figure 3). A summary of the review is provided in Table 4.

**Table 4 Areas proclaimed under RIWI Act in project area**

Aspect	Details	Result
Groundwater Areas	Groundwater areas proclaimed under the RIWI Act	Gascoyne Arrowsmith
Surface Water Areas	Surface water areas proclaimed under the RIWI Act	Irwin River Northampton Coast Greenough River
Irrigation District	Irrigation Districts proclaimed under the RIWI Act	None present
Rivers	Rivers proclaimed under the RIWI Act	None present
Public Drinking Water Source Areas (PDWSAs)	PDWSA is a collective term used for the description of Water Reserves, Catchment Areas and Underground Pollution Control Areas declared (gazetted) under the provisions of the <i>Metropolitan Water Supply, Sewage and Drainage Act 1909</i> or the <i>Country Area Water Supply Act 1947</i>	No.43922
Waterways Conservation Areas	Areas proclaimed under the <i>Waterway Conservation Act 1976</i> .	None present

### **3.2.1 Wetlands**

No Wetlands of National Significant or RAMSAR Wetlands intersect the study area (GoWA 2019b).

## **3.3 Vegetation and flora**

### **3.3.1 Broad vegetation mapping**

Broad scale (1:1,000,000) pre-European vegetation mapping of the Yalgoo (YAL), Avon Wheatbelt (AVW) and Geraldton Sandplains (GES) regions was completed by Beard (1976) at an association level. The mapping indicates nineteen vegetation associations intersect the study area (Table 5).

**Table 5 Broad scale vegetation associations intersecting the study area (Beard 1976)**

Vegetation association	Description	Location within study area (western portion of pipeline)
35	Shrublands; jam scrub with scattered York gum	Western/central section
36	Shrublands; thicket, acacia-casuarina alliance	Central section
129	Bare areas; dune sand	Western section
142	Medium woodland; York gum & salmon gum	Eastern section
352	Medium woodland; York gum	Eastern section
353	Shrublands; mallee & acacia scrub with scattered York gum	Central section
359	Shrublands; acacia & banksia scrub	Western section
371	Low forest; <i>Acacia rostellifera</i>	Western section
372	Mosaic: Shrublands; scrub-heath on deep sandy flats / Shrublands; thicket, acacia-casuarina alliance	Central section
379	Shrublands; scrub-heath on lateritic sandplain in the central Geraldton Sandplain Region	Central section
380	Shrublands; scrub-heath on sandplain	Central/eastern section
408	Shrublands; scrub-heath on coastal association, yellow sandplain	Western section
419	Shrublands; bowgada, jam and <i>Melaleuca uncinata</i> thicket	Eastern section
420	Shrublands; bowgada & jam scrub	Eastern section
440	Shrublands; <i>Acacia ligulata</i> open scrub	Western section
675	Shrublands; mixed thicket (melaluca & hakea)	Western section
676	Succulent steppe; samphire	Eastern section
687	Shrublands; bowgada & jam scrub with scattered <i>Allocasuarina heugelliana</i> & York gum	Central section
1413	Shrublands; acacia, casuarina & melaleuca thicket	Eastern section

### **3.3.2 Vegetation extent and status**

The pre-European vegetation mapping has been adapted and digitised by Shepherd *et al.* (2002). The extents of the vegetation associations have been determined by the State-wide vegetation remaining extent calculations maintained by the DBCA (current as of March 2019 – Government of WA (GoWA) 2019). As shown in Table 6 the current and remaining extents of vegetation associations mapped within the study area are varied.

**Table 6 Extents of vegetation associations mapped with the extent of the study area (Beard 1976, GoWA 2019a)**

Vegetation association	Scale	Pre-European extent (ha)	Current extent (ha)	Remaining (%)	%current extent in all DBCA managed lands

Note: red and orange indicate that less than 10 % and 30 %, respectively, of the pre-European extent remains.

### **3.3.3 Conservation significant ecological communities**

The EPBC Act PMST identified two federally listed TECs potentially occurring within the study area: Subtropical and Temperate Coastal Saltmarsh, and Eucalypt Woodlands of the Western Australian Wheatbelt (DAWE 2015). The DBCA TEC and PEC database search identified an additional two PECs and/or their buffers occurring within the study area (Table 7).

**Table 7 Conservation significant ecological communities identified in the desktop searches occurring within the study area**

Community	Description	Closest distance from study area boundary
Subtropical and Temperate Coastal Saltmarsh	DBCA: Priority 3 PEC EPBC Act: Vulnerable TEC	5.54 km north of PDE
Plant assemblages of the Moresby Range system	DBCA: Priority 1 PEC	6.5 km north-west of PDE
Coastal sands dominated by <i>Acacia rostelliflora</i> , <i>Eucalyptus oraria</i> and <i>Eucalyptus obtusiflora</i> (Geraldton area)	DBCA: Priority 1 PEC	1.34 km south of PDE
Wheatbelt Woodlands Eucalypt woodlands of the Western Australian Wheatbelt	DBCA: Priority 3 PEC EPBC Act: Critically Endangered TEC	4.75 km east of PDE

### **3.3.4 Flora diversity**

The *NatureMap* database identified 1964 flora species, representing 152 families, occurring within the study area. This total comprises 1781 native flora species, and 183 naturalised (non-native) flora species. Dominant families included Myrtaceae (233 taxa), Proteaceae (19 taxa), Fabaceae (160 taxa), Ericaceae (10 taxa) and Orchidaceae (9 taxa). Results from the database searches are presented in Appendix C.

### **3.3.5 Conservation significant flora**

Desktop searches of the EPBC Act PMST, *NatureMap*, DBCA, TPFL and WAHERB databases identified the presence/potential presence of 193 conservation significant flora species within the study area. The desktop searches recorded:

- 29 Threatened taxa (BC Act - 28 of these are also listed under the EPBC Act)
- 36 Priority 1 (P1) flora taxa
- 38 Priority 2 (P2) flora taxa
- 72 Priority 3 (P3) flora taxa
- 18 Priority 4 (P4) flora taxa

The locations of conservation significant flora recorded within the study area according to the DBCA TPFL and WAHERB databases are displayed in Figure 4 Appendix A

A desktop likelihood of occurrence assessment was undertaken for conservation significant flora species identified in the desktop searches (Appendix D). The assessment identified 85 flora taxa considered 'Likely' to occur within the PDE (species previously recorded within the PDE or within 10 km and large areas of suitable habitat occur in the PDE), 66 flora taxa who's presence

is considered ‘Possible’ within the PDE, 40 flora taxa which are considered ‘Unlikely’ to occur and two flora taxa which are considered ‘Highly Unlikely’ to occur within the PDE.

## 3.4 Fauna

### 3.4.1 Fauna diversity

The *NatureMap* database identified 643 fauna species previously recorded within the study area (DBCA 2007). This total included 264 birds, 237 invertebrates, 34 mammals, and 96 reptiles and 12 amphibian species. The EPBC act PMST indicated the potential presence of 31 additional fauna taxa within the study area (DAWE 2015). Database search results are presented in Appendix C.

### 3.4.2 Conservation significant fauna

Searches of the EPBC Act PMST (DAWE 2015), DBCA Threatened and Priority Fauna database and *NatureMap* database (DBCA 2007–) identified the presence/potential presence of 46 conservation significant fauna species within the study area. Species identified as exclusively marine (for example, fish, turtles, and whales) were excluded from any further assessment as no marine habitats are present within the PDE. Likewise, pelagic seabirds that do not inhabit coastal and inland areas have also been excluded from the likelihood of occurrence assessment. The remaining species comprised:

- Five Critically Endangered (two also listed as Migratory & one also listed as Endangered under EPBC Act)
- Five Endangered (one also listed as Migratory & one also listed as Vulnerable under EPBC Act)
- One presumed Extinct
- 20 Migratory
- One Other Specially Protected
- One Priority 1 (which is also listed as Vulnerable under EPBC Act)
- One Priority 3
- Six Priority 4
- Six Vulnerable (One also listed as Migratory & one also listed as Endangered under EPBC Act)

The locations of conservation significant fauna recorded within the study area according to the DBCA Threatened and Priority Fauna databases are displayed in Figure 4 Appendix A

A desktop likelihood of occurrence assessment was undertaken for conservation significant fauna species identified in the desktop searches (Appendix E). The assessment identified 12 fauna taxa ‘Known’ (previously recorded) to occur within the PDE, 23 fauna taxa considered ‘Likely’ to occur within the PDE, seven fauna taxa which are considered ‘Unlikely’ to occur and four fauna taxa which are considered ‘Highly Unlikely’ to occur within the PDE. The ‘known’ species are listed below:

- *Arenaria interpres* (Ruddy Turnstone)
- *Calidris alba* (Sanderling)
- *Calidris ruficollis* (Red-necked Stint)
- *Charadrius leschenaultii* (Greater Sand Plover)

- *Calyptorhynchus latirostris* (Carnaby's Cockatoo)
- *Oxyura australis* (Blue-billed Duck)
- *Pluvialis squatarola* (Grey Plover)
- *Thalasseus bergii* (Crested Tern)
- *Tringa nebularia* (Common Greenshank)
- *Cyclodomorphus branchialis* (Gilled Slender Blue-tongue Skink)
- *Egernia stokesii badia* (Western Spiny-tailed Skink)
- *Aspidites ramsayi* (southwest subpop.) (Woma python)

# **4. Conclusion**

## **4.1 Key Findings**

The key findings of the desktop assessment include:

- No Threatened or Priority Ecological communities intersect the PDE.
- The fauna likelihood assessments found 12 known conservation significant fauna taxa previously recorded in the PDE
- The flora likelihood assessments found 85 likely conservation significant flora taxa, which includes species previously recorded within the PDE or within 10 km with large areas of suitable habitat occurring in the PDE
- No wetlands (RAMSAR or of National importance), DBCA managed lands or Environmentally Sensitive Areas intersect the PDE.
- Nine areas have been identified has those to avoid along the pipeline corridor (Avoidance areas).
- Avoidance areas have been quantified by assessing the number of conservation significant flora and fauna and their priority status within certain zones.
- Location is due to:
  - Large number of taxa of various priority status'
  - Limited number of taxa with high priority status'

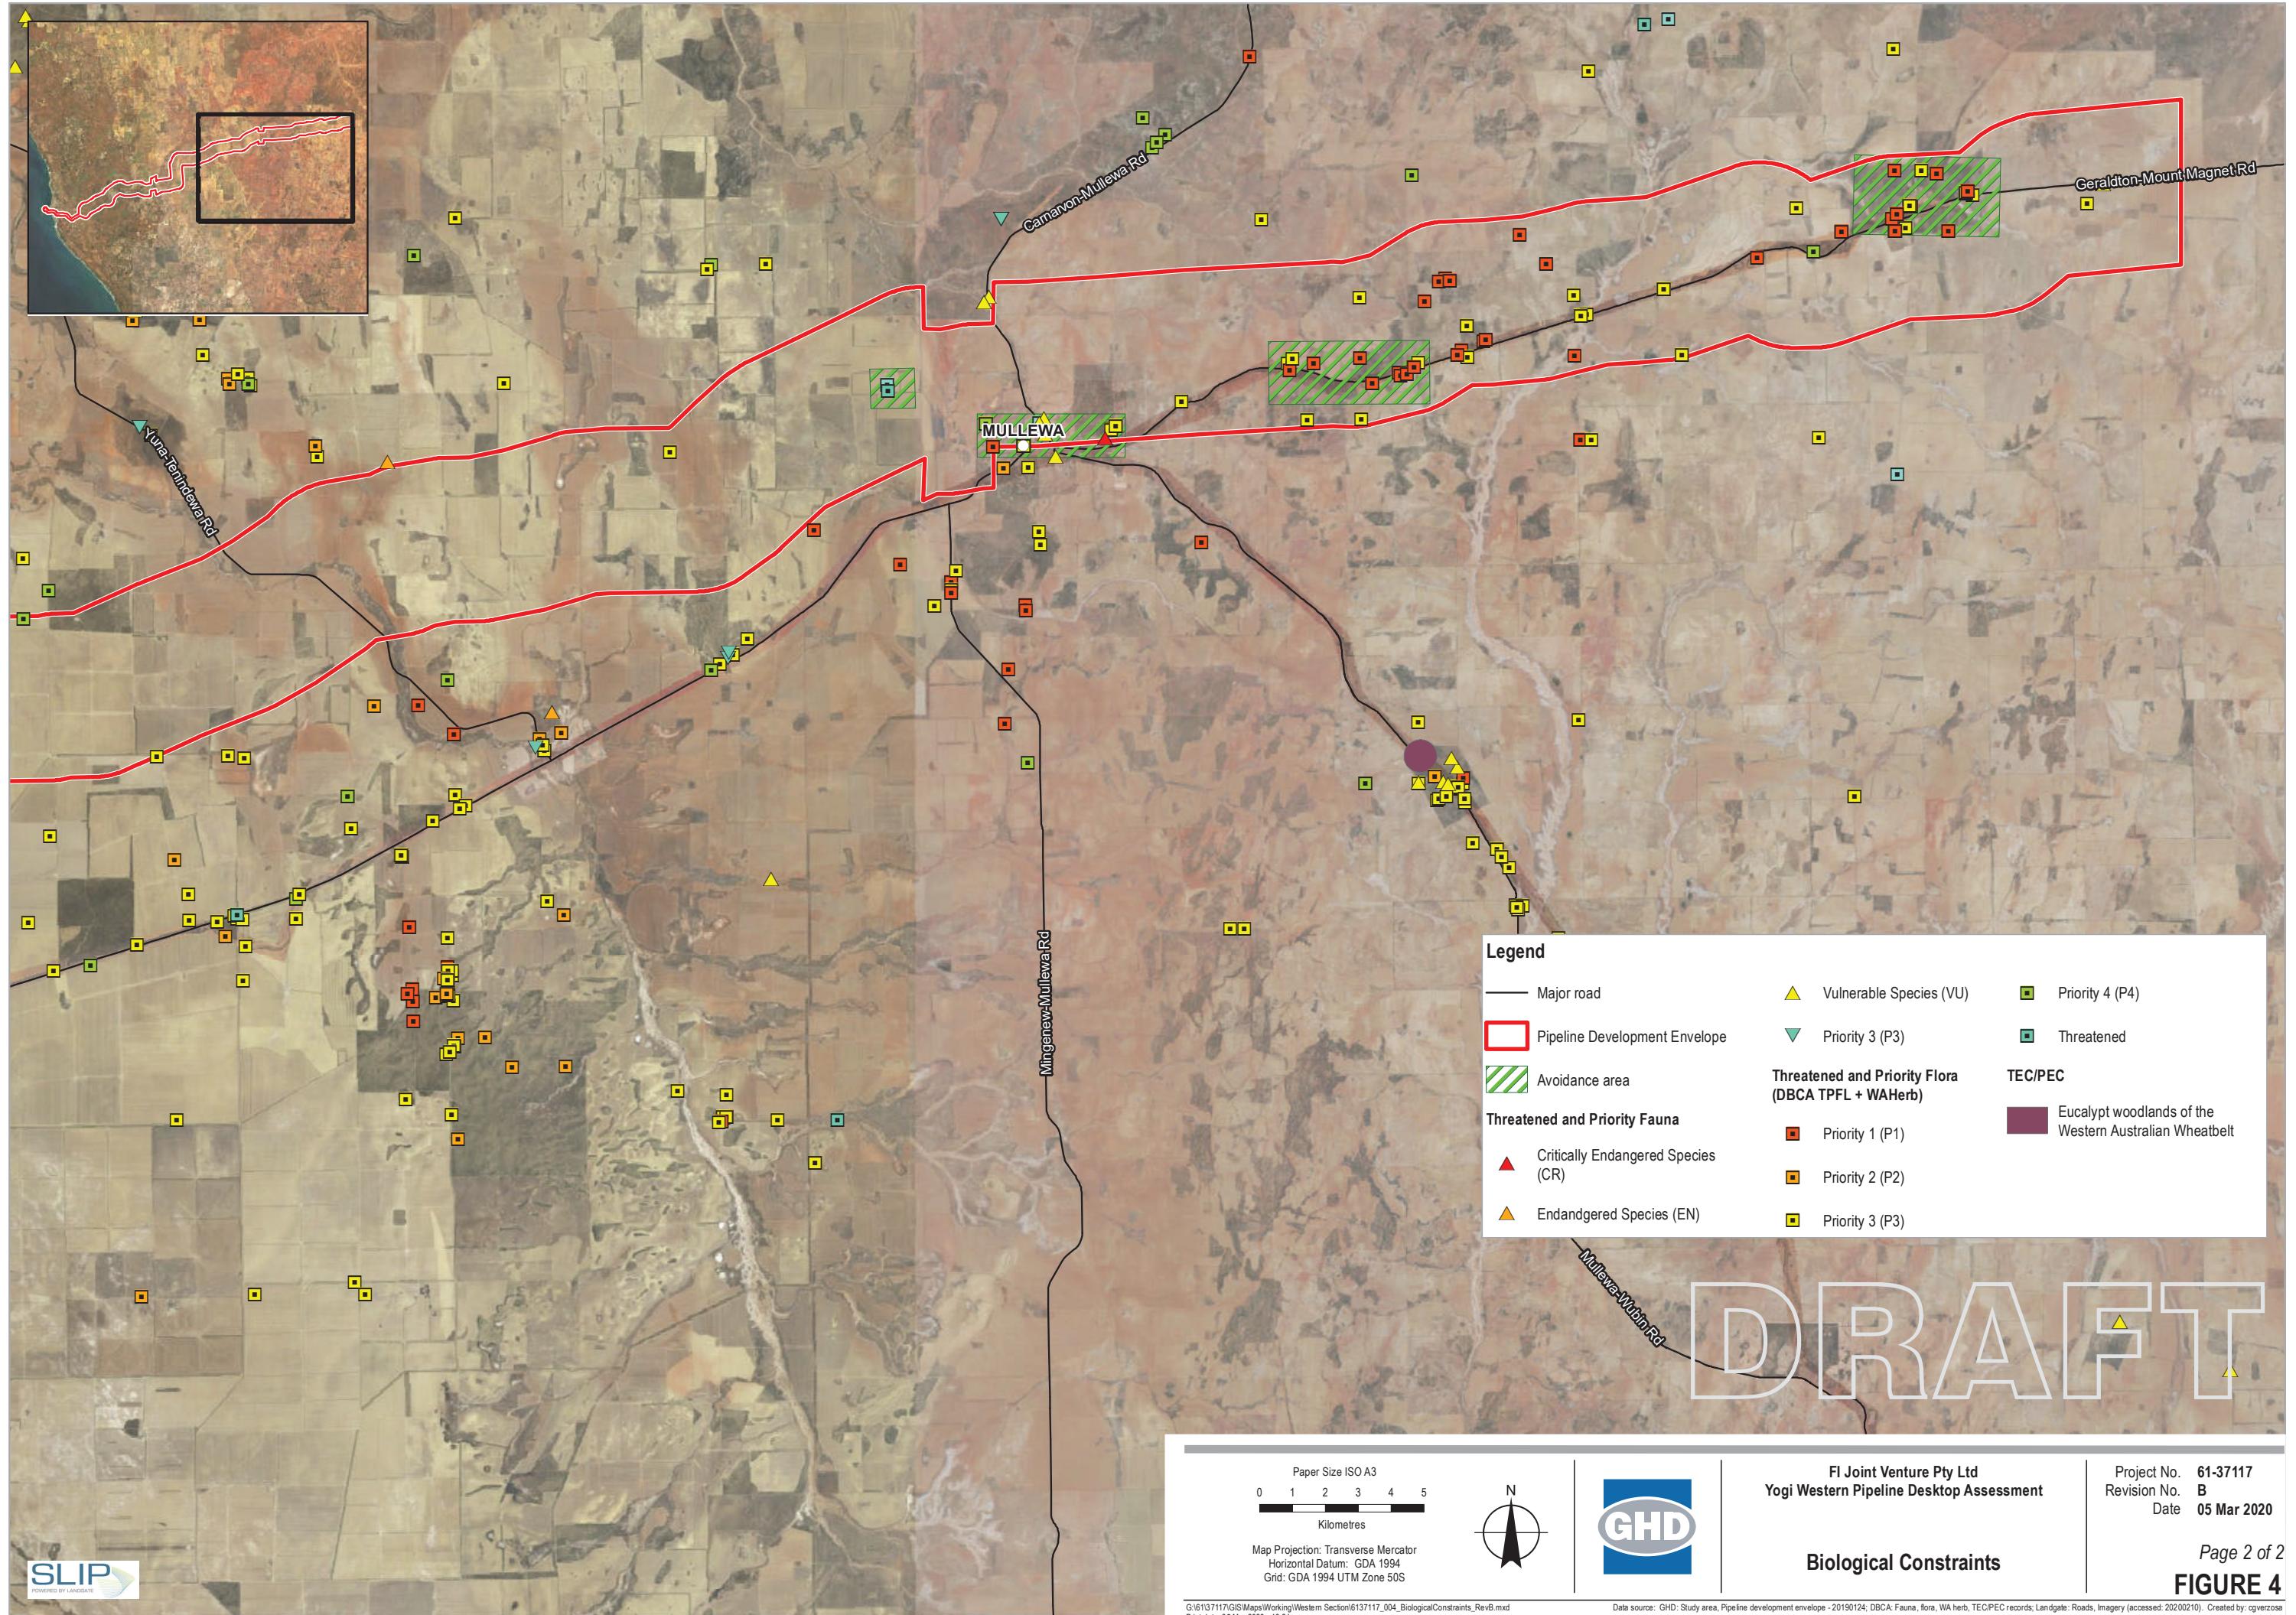

## **FIGURE 3**

## **Appendix B** – Relevant legislation, conservation codes and background information

## **Relevant legislation**

### **Federal Environment Protection and Biodiversity Conservation Act 1999**

The *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) is the Federal Government's central piece of environmental legislation. It provides a legal framework to protect and manage nationally and internationally important flora, fauna, ecological communities and heritage places, which are defined in the EPBC Act as Matters of National Environmental Significance (MNES).

The biological aspects listed as MNES include:

- Nationally threatened flora and fauna species and ecological communities
- Migratory species

A person must not undertake an action that has, will have, or is likely to have a significant impact (direct or indirect) on MNES, without approval from the Federal Minister for the Environment.

The EPBC Act is administered by the Department of Agriculture, Water and the Environment (DAWE).

### **State Environmental Protection Act 1986**

The *Environmental Protection Act 1986* (EP Act) is the primary legislative Act dealing with the protection of the environment in Western Australia. The Act allows the Environmental Protection Authority (EPA), to prevent, control and abate pollution and environmental harm, for the conservation, preservation, protection, enhancement and management of the environment and for matters incidental to or connected with the foregoing. Part IV of the EP Act is administered by the EPA and makes provisions for the EPA to undertake environmental impact assessment of significant proposals, strategic proposals and land use planning schemes.

The Department of Water and Environment Regulation (DWER) is responsible for administering the clearing provisions of the EP Act (Part V). Clearing of native vegetation in Western Australia requires a permit from the DWER, unless exemptions apply. Applications for clearing permits are assessed by the Department and decisions are made to grant or refuse the application in accordance with the Act. When making a decision the assessment considers clearing against the ten clearing principles as specified in Schedule 5 of the EP Act:

- a) Native vegetation should not be cleared if it comprises a high level of biodiversity.
- b) Native vegetation should not be cleared if it comprises the whole or a part of, or is necessary for the maintenance of a significance habitat for fauna indigenous to Western Australia.
- c) Native vegetation should not be cleared if it includes, or is necessary, for the continued existence of rare flora.
- d) Native vegetation should not be cleared if it comprises the whole or part of native vegetation in an area that has been extensively cleared.
- e) Native vegetation should not be cleared if it is significant as a remnant of native vegetation in an area that has been extensively cleared.
- f) Native vegetation should not be cleared if it is growing in, or in association with, an environment associated with a watercourse or wetland.
- g) Native vegetation should not be cleared if the clearing of the vegetation is likely to have an impact on the environmental values of any adjacent or nearby conservation area.
- h) Native vegetation should not be cleared if the clearing of the vegetation is likely to cause appreciable land degradation.
- i) Native vegetation should not be cleared if the clearing of the vegetation is likely to cause deterioration in the quality of surface or underground water.

- j) Native vegetation should not be cleared if clearing the vegetation is likely to cause, or exacerbate, the incidence of flooding.

Exemptions for clearing include clearing that is a requirement of a written law or authorised under certain statutory processes (listed in Schedule 6 of the EP Act) and exemptions for prescribed low impact day-to-day activities (prescribed in the Environmental Protection (Clearing of Native Vegetation) Regulations 2004); these exemptions do not apply in environmentally sensitive areas (ESAs).

### ***State Biodiversity and Conservation Act 2016***

The *Biodiversity Conservation Act 2016* (BC Act) provides for the conservation and protection of biodiversity and biodiversity components, as well as the promotion of the ecologically sustainable use of biodiversity components in Western Australia. The BC Act replaces both the repealed *Wildlife Conservation Act 1950* (WC Act) and the *Sandalwood Act 1929* (Sandalwood Act), as well as their associated regulations. To attain the objectives of the BC Act, principles of ecological sustainable development have been established:

- Decision-making processes should effectively integrate both long-term and short-term economic, environmental, social and equitable considerations
- If there are threats of serious or irreversible environmental damage, lack of full scientific certainty should not be used as a reason for postponing measures to prevent environmental degradation
- The present generation should ensure that the health, diversity and productivity of the environment is maintained or enhanced for the benefit of future generations
- The conservation of biodiversity and ecological integrity should be a fundamental consideration in decision-making
- Improved valuation, pricing and incentive mechanisms should be promoted.

The BC Act is administered by the Department of Biodiversity Conservation and Attractions (DBCA).

### ***State Biosecurity and Agriculture Management Act 2007***

The *Biosecurity and Agriculture Management Act 2007* (BAM Act) and associated regulations are administered by the Department of Primary Industries and Regional Development (DPIRD) and replace the repealed *Agriculture and Related Resources Protection Act 1976*. The main purposes of the BAM Act and its regulations are to:

- Prevent new animal and plant pests (vermin and weeds) and diseases from entering WA
- Manage the impact and spread of those pests already present in the state
- Safely manage the use of agricultural and veterinary chemicals
- Increased control over the sale of agricultural products that contain violative chemical residues.

The Western Australian Organism List (WAOL) provides the status of organisms which have been categorised under the BAM Act. A Declared Pest is a prohibited organism or an organism for which a declaration under Section 22(2) of the Act is in force. Declared Pests may be assigned a control category including: C1 (exclusion), C2 (eradication) and C3 (management). The category may apply to the whole of the State, LGAs, districts, individual properties or even paddocks, and all landholders are obliged to comply with the specific category of control. Categories of control are defined below.

## DPIRD Categories for Declared Pests under the BAM Act

Control class code	Description
C1 (Exclusion)	Pests will be assigned to this category if they are not established in Western Australia and control measures are to be taken, including border checks, in order to prevent them entering and establishing in the State.
C2 (Eradication)	Pests will be assigned to this category if they are present in Western Australia in low enough numbers or in sufficiently limited areas that their eradication is still a possibility.
C3 (Management)	Pests will be assigned to this category if they are established in Western Australia but it is feasible, or desirable, to manage them in order to limit their damage. Control measures can prevent a C3 pest from increasing in population size or density or moving from an area in which it is established into an area which currently is free of that pest.

## Background information

### Environmentally Sensitive Areas

Environmentally Sensitive Areas (ESAs) are declared by the Minister for Environment under Section 51B of the EP Act. The Table below outlines the aspects of areas declared as ESA in the Environmental Protection (Environmentally Sensitive Areas) Notice 2005.

### Aspects of ESAs

Aspects of Environmentally Sensitive Areas
A declared World Heritage property as defined in Section 13 of the EPBC Act.
An area that is included on the Register of the National Estate (RNE), because of its natural values, under the <i>Australian Heritage Commission Act 1975</i> of the Commonwealth (the RNE was closed in 2007 and is no longer a statutory list – all references to the RNE were removed from the EPBC Act on 19 February 2012).
A defined wetland and the area within 50 m of the wetland. Defined wetlands include Ramsar wetlands, conservation category wetlands and nationally important wetlands.
The area covered by vegetation within 50 m of rare flora, to the extent to which the vegetation is continuous with the vegetation in which the rare flora is located.
The area covered by a Threatened Ecological Community.
A Bush Forever Site listed in “Bush Forever” Volumes 1 and 2 (2000), published by the Western Australia Planning Commission, except to the extent to which the site is approved to be developed by the Western Australia Planning Commission.
The areas covered by the <i>Environmental Protection (Gnangara Mound Crown Land) Policy 1992</i> .
The areas covered by the <i>Environmental Protection (Western Swamp Tortoise Habitat) Policy 2002</i> .
The areas covered by the lakes to which the <i>Environmental Protection (Swan Coastal Plain Lakes) Policy 1992</i> (EPP Lakes) applies.
Protected wetlands as defined in the <i>Environmental Protection (South West Agricultural Zone Wetlands) Policy 1998</i> .

## Reserves and conservation areas

### Department of Biodiversity, Conservation and Attractions managed lands and waters

DBCA manages lands and waters throughout Western Australia to conserve ecosystems and species, and to provide for recreation and appreciation of the natural environment. DBCA managed lands and waters include national parks, conservation parks and reserves, marine parks and reserves, regional parks, nature reserves, State forest and timber reserves. DBCA managed conservation estate, is vested with the Conservation Commission of Western Australia. Access to, or through, some areas of DBCA managed lands may require a permit or could be restricted due to management activities.

Proposed land use changes and development proposals that abut DBCA managed lands will generally be referred to DBCA throughout the assessment process.

### ***Wetlands***

Wetlands include not only lakes with open water, but areas of seasonally, intermittently or permanently waterlogged soil.

### **Ramsar Listed Wetlands**

The Convention of Wetlands of International Importance was signed in 1971 at the Iranian town of Ramsar. The Convention has since been referred to as the Ramsar Convention. Ramsar Listed wetlands are “sites containing representative, rare or unique wetlands, or wetlands that are important for conserving biological diversity … because of their ecological, botanical, zoological, limnological or hydrological importance” (DAWE 2020b). Once a Ramsar Listed Wetland is designated, the country agrees to manage its conservation and ensure its wise use. Under the Convention, wise use is broadly defined as “maintaining the ecological character of a wetland” (DAWE 2020b).

### **Nationally important wetlands**

Wetlands of national significance are listed under the Directory of Important Wetlands in Australia. Nationally important wetlands are wetlands which meet at least one of the following criteria (DAWE 2020a):

- It is a good example of a wetland type occurring within a biogeographic region in Australia
- It is a wetland which plays an important ecological or hydrological role in the natural functioning of a major wetland system/complex
- It is a wetland which is important as the habitat for animal taxa at a vulnerable stage in their life cycles, or provides a refuge when adverse conditions such as drought prevail
- The wetland supports one percent or more of the national populations of any native plant or animal taxa
- The wetland supports native plant or animal taxa or communities which are considered endangered or vulnerable at the national level
- The wetland is of outstanding historical or cultural significance

### ***Vegetation extent and status***

The National Objectives and Targets for Biodiversity Conservation 2001–2005 (Commonwealth of Australia 2001) recognise that the retention of 30 percent or more of the pre-clearing extent of each ecological community is necessary if Australia’s biological diversity is to be protected. This is the threshold level below which species loss appears to accelerate exponentially and loss below this level should not be permitted. This level of recognition is in keeping with the targets recommended in the review of the National Strategy for the Conservation of Australia’s Biological Diversity (ANZECC 2000).

The extent of remnant native vegetation in WA has been assessed by Shepherd et al. (2002) and the GoWA (2019), based on broadscale vegetation association mapping by Beard (various publications). The GoWA produces Statewide Vegetation Statistics Reports that are used for a number of purposes including conservation planning, land use planning and when assessing development applications. The reports are updated at least every two years.

### ***Vegetation condition***

The vegetation condition can be assessed in accordance with the vegetation condition rating scale for the South West and Interzone Botanical Provinces (EPA 2016a). The scale recognises the intactness of vegetation and consists of six rating levels as outlined below.

## Vegetation condition rating scale for the South West and Interzone Botanical Provinces

Condition	South West and Interzone Botanical Provinces description
Pristine	Pristine or nearly so, no obvious signs of damage caused by human activities since European settlement.
Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species. Damage to trees caused by fire, the presence of non-aggressive weeds and occasional vehicle tracks.
Very Good	Vegetation structure altered, obvious signs of disturbance. Disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.
Good	Vegetation structure significantly altered by very obvious signs of multiple disturbances. Retains basic vegetation structure or ability to regenerate it. Disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.
Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. Disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds at high density, partial clearing, dieback and grazing.
Completely Degraded	The structure of vegetation is no longer intact and the area is completely or almost completely without native species. These areas are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.

## Conservation codes

Species of significant flora, fauna and communities are protected under both Federal and State Acts. The Federal EPBC Act provides a legal framework to protect and manage nationally important flora and communities. The State BC Act is the primary wildlife conservation legislation in Western Australia. Information on the conservation codes is summarised in the following sections.

## Ecological communities

### Conservation significant communities

Ecological communities are defined as naturally occurring biological assemblages that occur in a particular type of habitat (English and Blyth 1997). Federally listed Threatened Ecological Communities (TECs) are protected under the EPBC Act. The BC Act provides for the Minister to list an ecological community as a TEC (section 27), or as a collapsed ecological community (section 31) statutory listing of State TECs by the Minister. The legislation also describes statutory processes for preparing recovery plans for TECs, the registration of their critical habitat, and penalties for unauthorised modification of TECs.

Possible TECs that do not meet survey criteria are added to the DBCA Priority Ecological Community (PEC) List under Priorities 1, 2 and 3. These are ecological communities that are adequately known; are rare but not threatened, or meet criteria for Near Threatened. PECs that have been recently removed from the threatened list are placed in Priority 4. These ecological communities require regular monitoring. Conservation dependent ecological communities are placed in Priority 5. PECs are not listed under any formal Federal or State legislation, however, may be listed as TECs under the EPBC Act.

### Conservation codes and definitions for TECs listed under the EPBC Act and/ or BC Act

Categories	Definition
<b>Federal Government Conservation Categories (EPBC Act)</b>	
Critically Endangered (CR)	An ecological community if, at that time, is facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with the prescribed criteria (as outlined in Environment Protection and Biodiversity Conservation Regulations 2000)

Categories	Definition
Endangered (EN)	An ecological community if, at that time: A)is not critically endangered; and B)is facing a very high risk of extinction in the wild in the near future, as determined in accordance with the prescribed criteria (as outlined in Environment Protection and Biodiversity Conservation Regulations 2000)
Vulnerable (VU)	An ecological community if, at that time: A)is not critically endangered or endangered; and B)is facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with the prescribed criteria (as outlined in Environment Protection and Biodiversity Conservation Regulations 2000)

#### **Western Australia Conservation Categories (BC Act)**

##### Threatened Ecological Communities

Critically Endangered (CR)	An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or that was originally of limited distribution and is facing severe modification or destruction throughout its range in the immediate future, or is already severely degraded throughout its range but capable of being substantially restored or rehabilitated.
Endangered (EN)	An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or was originally of limited distribution and is in danger of significant modification throughout its range or severe modification or destruction over most of its range in the near future.
Vulnerable (VU)	An ecological community that has been adequately surveyed and is found to be declining and/or has declined in distribution and/or condition and whose ultimate security has not yet been assured and/or a community that is still widespread but is believed likely to move into a category of higher threat in the near future if threatening processes continue or begin operating throughout its range.

##### Collapsed ecological communities

An ecological community is eligible for listing as a collapsed ecological community at a particular time if, at that time –

- (a) there is no reasonable doubt that the last occurrence of the ecological community has collapsed); or
- (b) the ecological community has been so extensively modified throughout its range that no occurrence of it is likely to recover –
  - (i) its species composition or structure; or
  - (ii) its species composition and structure.

Section 33 of the BC Act provides for a collapsed ecological community to be regarded as a threatened ecological community if it is discovered in a state that no longer makes it eligible for listing as a collapsed ecological community.

#### **Conservation categories and definitions for PECS as listed by the DBCA**

Category	Description
Priority 1	Poorly known ecological communities. Ecological communities that are known from very few occurrences with a very restricted distribution (generally ≤5 occurrences or a total area of ≤100 ha). Occurrences are believed to be under threat either due to limited extent, or being on lands under immediate threat (e.g. within agricultural or pastoral lands, urban areas, active mineral leases) or for which current threats exist. May include communities with occurrences on protected lands. Communities may be included if they are comparatively well-known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under immediate threat from known threatening processes across their range.

Category	Description
Priority 2	<p>Poorly known ecological communities.</p> <p>Communities that are known from few occurrences with a restricted distribution (generally ≤10 occurrences or a total area of ≤200 ha). At least some occurrences are not believed to be under immediate threat of destruction or degradation.</p> <p>Communities may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under threat from known threatening processes.</p>
Priority 3	<p>Poorly known ecological communities.</p> <ul style="list-style-type: none"> <li>(i) Communities that are known from several to many occurrences, a significant number or area of which are not under threat of habitat destruction or degradation or;</li> <li>(ii) communities known from a few widespread occurrences, which are either large or with significant remaining areas of habitat in which other occurrences may occur, much of it not under imminent threat, or;</li> <li>(iii) communities made up of large, and/or widespread occurrences, that may or may not be represented in the reserve system, but are under threat of modification across much of their range from processes such as grazing by domestic and/or feral stock, and inappropriate fire regimes.</li> </ul> <p>Communities may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and/or are not well defined, and known threatening processes exist that could affect them.</p>
Priority 4	<p>Ecological communities that are adequately known, rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list. These communities require regular monitoring.</p> <ul style="list-style-type: none"> <li>(i) Rare. Ecological communities known from few occurrences that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These communities are usually represented on conservation lands.</li> <li>(ii) Near Threatened. Ecological communities that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for Vulnerable.</li> <li>(iii) Ecological communities that have been removed from the list of threatened communities during the past five years.</li> </ul>
Priority 5	<p>Conservation Dependent ecological communities.</p> <p>Ecological communities that are not threatened but are subject to a specific conservation program, the cessation of which would result in the community becoming threatened within five years.</p>

### Other significant vegetation

Vegetation may be significant for a range of reasons other than a statutory listing. The EPA (2016b) states that significant vegetation may include vegetation that includes the following:

- Restricted distribution
- Degree of historical impact from threatening processes
- Local endemism in restricted habitats
- Novel combinations of taxa
- A role as a refuge
- A role as a key habitat for Threatened species or large population representing a significant proportion of the local to regional total population of a species
- Being representative of a vegetation unit in ‘pristine’ condition in a highly cleared landscape, recently discovered range extensions, or isolated outliers of the main range)
- Being poorly reserved.

This may apply at a number of levels, so the unit may be significant when considered at the fine-scale (intra-locality), intermediate-scale (locality or inter-locality) or broad-scale (local to region).

## Flora and fauna

### ***Conservation significant flora and fauna***

Species of significant flora are protected under both Federal and State legislation. Any activities that are deemed to have a significant impact on species that are recognised by the EPBC Act, and/or the BC Act can warrant referral to the DAWE and/or the EPA.

The Federal conservation level of flora and fauna species and their significance status is assessed under the EPBC Act. The significance levels for flora and fauna used in the EPBC Act align with the International Union for Conservation of Nature (IUCN) Red List criteria, which are internationally recognised as providing best practice for assigning the conservation status of species. The EPBC Act also protects land and migratory species that are listed under International Agreements. The list of migratory species established under section 209 of the EPBC Act comprises:

- Migratory species which are native to Australia and are included in the appendices to the Bonn Convention (Convention on the Conservation of Migratory Species of Wild Animals Appendices I and II)
- Migratory species included in annexes established under the Japan-Australia Migratory Bird Agreement (JAMBA) and the China–Australia Migratory Bird Agreement (CAMBA)
- Native, migratory species identified in a list established under, or an instrument made under, an international agreement approved by the Minister, such as the Republic of Korea–Australia Migratory Bird Agreement (ROKAMBA)

The State conservation level of flora and fauna species and their significance status also follows the IUCN Red List criteria. Under the BC Act flora and fauna can be listed as Threatened, Extinct and as Specially Protected species.

Threatened species are those species which have been adequately searched for and are deemed to be, in the wild, either rare, under identifiable threat of extinction, or otherwise in need of special protection, and have been gazetted as such. The assessment of the conservation status of Threatened species is based on their national extent and ranked according to their level of threat using IUCN Red List categories and criteria. Specially protected species meet one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection. Species that are listed as Threatened or Extinct species under the BC Act cannot also be listed as Specially Protected species.

Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened flora or fauna.

Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

For the purposes of this assessment, all species listed under the EPBC Act, BC Act and DBCA Priority species are considered conservation significant.

## Conservation categories and definitions for EPBC Act and BC Act listed flora and fauna species

Conservation category	Definition
Threatened species	
Critically Endangered (CR)	<p>Threatened species considered to be “facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines”.</p> <p>Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines.</p>
Endangered (EN)	<p>Threatened species considered to be “facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines”.</p> <p>Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines</p>
Vulnerable (VU)	<p>Threatened species considered to be “facing a high risk of extinction in the wild in the medium term future, as determined in accordance with criteria set out in the ministerial guidelines”.</p> <p>Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines.</p>
Extinct species	
Extinct (EX)	Species where “there is no reasonable doubt that the last member of the species has died”, and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).
Extinct in the Wild (EW)	Species that “is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form”, and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).
Specially protected species	
Migratory (MI)	<p>Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).</p> <p>Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the Convention on the Conservation of Migratory Species of Wild Animals (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species</p>
Species of special conservation interest (conservation dependent fauna) (CD)	Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened.

Conservation category	Definition
Other specially protected fauna (OS)	Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

#### Conservation codes for DBCA listed Priority flora and fauna

Priority category	Definition
Priority 1	<b>Poorly-known taxa</b> Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.
Priority 2	<b>Poorly-known taxa</b> Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.
Priority 3	<b>Poorly-known taxa</b> Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.
Priority 4	<b>Rare, Near Threatened and other taxa in need of monitoring</b> A. Rare: Taxa that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These taxa are usually represented on conservation lands. B. Near Threatened. Taxa that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for Vulnerable. C. Taxa that have been removed from the list of threatened taxa during the past five years for reasons other than taxonomy.

#### Other significant flora

Flora species, subspecies, varieties, hybrids and ecotypes may be significant for a range of reasons, other than a statutory listing. The EPA (2016b) states that significant flora may include taxa that have:

- A keystone role in a particular habitat for threatened or Priority flora or fauna species, or large populations representing a considerable proportion of the local or regional total population of a species
- Relictual status, being representation of taxonomic or physiognomic groups that no longer occur widely in the broader landscape

- Anomalous features that indicate a potential new discovery
- Being representative of the range of a species (particularly, at the extremes of range, recently discovered range extensions, or isolated outliers of the main range)
- The presence of restricted subspecies, varieties, or naturally occurring hybrids
- Local endemism (a restricted distribution) or association with a restricted habitat type (e.g. surface water or groundwater dependent ecosystems)
- Being poorly reserved

### **Other significant fauna**

Fauna species may be significant for a range of reasons other than those protected by international agreement or treaty, Specially Protected or Priority Fauna. Significant fauna may include short-range endemic species, species that have declining populations or declining distributions, species at the extremes of their range, or isolated outlying populations, or species which may be undescribed (EPA 2010).

### ***Introduced plants (weeds)***

#### **Declared Pests**

Information on species considered to be Declared Pests is provided under *State Biosecurity and Agriculture Management Act 2007*.

#### **Weeds of National Significance**

The spread of weeds across a range of land uses or ecosystems is important in the context of socio-economic and environmental values. The assessment of Weeds of National Significance (WoNS) is based on four major criteria:

- Invasiveness
- Impacts
- Potential for spread
- Socio-economic and environmental values

Australian state and territory governments have identified thirty-two Weeds of National Significance (WoNS); a list of 20 WoNS was endorsed in 1999 and a further 12 were added in 2012.

# EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 15/01/20 14:28:16

# Summary

## Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

<a href="#">World Heritage Properties:</a>	None
<a href="#">National Heritage Places:</a>	None
<a href="#">Wetlands of International Importance:</a>	None
<a href="#">Great Barrier Reef Marine Park:</a>	None
<a href="#">Commonwealth Marine Area:</a>	None
<a href="#">Listed Threatened Ecological Communities:</a>	1
<a href="#">Listed Threatened Species:</a>	56
<a href="#">Listed Migratory Species:</a>	38

## Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

### Matters of National Environmental Significance

#### Listed Threatened Ecological Communities

#### [ Resource Information ]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Name	Status	Type of Presence
<a href="#">Subtropical and Temperate Coastal Saltmarsh</a>	Vulnerable	Community likely to occur within area
<b>Listed Threatened Species</b>

Invasive Species	[ Resource Information ]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.	

Name	Status	Type of Presence
<b>Birds</b>		
Anas platyrhynchos Mallard [974]		Species or species habitat likely to occur within area
Columba livia Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Passer montanus</i> Eurasian Tree Sparrow [406]		Species or species habitat likely to occur within area
<i>Streptopelia senegalensis</i> Laughing Turtle-dove, Laughing Dove [781]		Species or species habitat likely to occur within area
<b>Mammals</b>		
<i>Bos taurus</i> Domestic Cattle [16]		Species or species habitat likely to occur within area
<i>Canis lupus familiaris</i> Domestic Dog [82654]		Species or species habitat likely to occur within area
<i>Capra hircus</i> Goat [2]		Species or species habitat likely to occur within area
<i>Felis catus</i> Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
Feral deer Feral deer species in Australia [85733]		Species or species habitat likely to occur within area
<i>Mus musculus</i> House Mouse [120]		Species or species habitat likely to occur within area
<i>Oryctolagus cuniculus</i> Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
<i>Rattus rattus</i> Black Rat, Ship Rat [84]		Species or species habitat likely to occur within area
<i>Sus scrofa</i> Pig [6]		Species or species habitat likely to occur within area
<i>Vulpes vulpes</i> Red Fox, Fox [18]		Species or species habitat likely to occur within area
<b>Plants</b>		
<i>Asparagus asparagoides</i> Bridal Creeper, Bridal Veil Creeper, Smilax, Florist's Smilax, Smilax Asparagus [22473]		Species or species habitat likely to occur within area
<i>Cenchrus ciliaris</i> Buffel-grass, Black Buffel-grass [20213]		Species or species habitat may occur within area
<i>Chrysanthemoides monilifera</i> subsp. <i>monilifera</i> Boneseed [16905]		Species or species habitat likely to occur within area
<i>Lantana camara</i> Lantana, Common Lantana, Kamara Lantana, Large-leaf Lantana, Pink Flowered Lantana, Red Flowered Lantana, Red-Flowered Sage, White Sage, Wild Sage [10892]		Species or species habitat likely to occur within area
<i>Lycium ferocissimum</i> African Boxthorn, Boxthorn [19235]		Species or species habitat likely to occur within area
<i>Opuntia</i> spp. Prickly Pears [82753]		Species or species

Name	Status	Type of Presence habitat likely to occur within area
<i>Salvinia molesta</i> Salvinia, Giant Salvinia, Aquarium Watermoss, Kariba Weed [13665]		Species or species habitat may occur within area
<i>Tamarix aphylla</i> Athel Pine, Athel Tree, Tamarisk, Athel Tamarisk, Athel Tamarix, Desert Tamarisk, Flowering Cypress, Salt Cedar [16018]		Species or species habitat likely to occur within area

## Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

# EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 15/01/20 14:45:01

# Summary

## Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

<a href="#">World Heritage Properties:</a>	None
<a href="#">National Heritage Places:</a>	None
<a href="#">Wetlands of International Importance:</a>	None
<a href="#">Great Barrier Reef Marine Park:</a>	None
<a href="#">Commonwealth Marine Area:</a>	None
<a href="#">Listed Threatened Ecological Communities:</a>	1
<a href="#">Listed Threatened Species:</a>	24
<a href="#">Listed Migratory Species:</a>	7

## Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

## Details

### Matters of National Environmental Significance

Listed Threatened Ecological Communities	[ Resource Information ]	
Name	Status	Type of Presence
<a href="#">Eucalypt Woodlands of the Western Australian Wheatbelt</a>	Critically Endangered	Community likely to occur within area
Listed Threatened Species	[ Resource Information ]	
Name	Status	Type of Presence
<b>Birds</b>		
<a href="#">Calidris ferruginea</a>		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
<a href="#">Calyptorhynchus latirostris</a>		
Carnaby's Cockatoo, Short-billed Black-Cockatoo [59523]	Endangered	Species or species habitat likely to occur within area
<a href="#">Leipoa ocellata</a>		
Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area
<a href="#">Pezoporus occidentalis</a>		
Night Parrot [59350]	Endangered	Species or species habitat may occur within area
<a href="#">Rostratula australis</a>		
Australian Painted Snipe [77037]	Endangered	Species or species habitat may occur within area
<b>Mammals</b>		
<a href="#">Dasyurus geoffroii</a>		
Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat may occur within area
<b>Other</b>		
<a href="#">Idiosoma nigrum</a>		
Shield-backed Trapdoor Spider, Black Rugose Trapdoor Spider [66798]	Vulnerable	Species or species habitat likely to occur within area
<b>Plants</b>		
<a href="#">Acacia cochlocarpa subsp. cochlocarpa</a>		
Spiral-fruited Wattle [23877]	Endangered	Species or species habitat may occur within area
<a href="#">Caladenia bryceana subsp. cracens</a>		
Northern Dwarf Spider-orchid [64556]	Vulnerable	Species or species habitat known to occur within area
<a href="#">Caladenia hoffmannii</a>		
Hoffman's Spider-orchid [56719]	Endangered	Species or species habitat may occur within

Name	Status	Type of Presence area
<a href="#"><u>Caladenia wanosa</u></a> Kalbarri Spider-orchid [5878]	Vulnerable	Species or species habitat known to occur within area
<a href="#"><u>Conostylis micrantha</u></a> Small-flowered Conostylis [17635]	Endangered	Species or species habitat may occur within area
<a href="#"><u>Dasmalla axillaris</u></a> Native Foxglove [38829]	Critically Endangered	Species or species habitat likely to occur within area
<a href="#"><u>Eleocharis papillosa</u></a> Dwarf Desert Spike-rush [2519]	Vulnerable	Species or species habitat may occur within area
<a href="#"><u>Eremophila nivea</u></a> Silky Eremophila [14431]	Endangered	Species or species habitat may occur within area
<a href="#"><u>Eremophila viscosa</u></a> Varnish Bush [2394]	Endangered	Species or species habitat known to occur within area
<a href="#"><u>Eucalyptus beardiana</u></a> Beard's Mallee [18933]	Vulnerable	Species or species habitat known to occur within area
<a href="#"><u>Eucalyptus synandra</u></a> Jingymia Mallee [3753]	Vulnerable	Species or species habitat likely to occur within area
<a href="#"><u>Grevillea pythara</u></a> Pythara Grevillea [64525]	Endangered	Species or species habitat may occur within area
<a href="#"><u>Gyrostemon reticulatus</u></a> Net-veined Gyrostemon [8491]	Critically Endangered	Species or species habitat known to occur within area
<a href="#"><u>Leucopogon marginatus</u></a> Thick-margined Leucopogon [12527]	Endangered	Species or species habitat likely to occur within area
<a href="#"><u>Roxeia pycnophylloides</u></a> Saltmat [21161]	Endangered	Species or species habitat likely to occur within area
<a href="#"><u>Wurmbea tubulosa</u></a> Long-flowered Nancy [12739]	Endangered	Species or species habitat may occur within area

#### Reptiles

<a href="#"><u>Egernia stokesii badia</u></a> Western Spiny-tailed Skink, Baudin Island Spiny-tailed Skink [64483]	Endangered	Species or species habitat known to occur within area
---	------------	---

#### Listed Migratory Species

[ [Resource Information](#) ]

\* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.

Name	Threatened	Type of Presence
<a href="#"><u>Migratory Marine Birds</u></a> <a href="#"><u>Apus pacificus</u></a> Fork-tailed Swift [678]		Species or species habitat likely to occur within area

#### Migratory Terrestrial Species

<a href="#"><u>Motacilla cinerea</u></a> Grey Wagtail [642]	Species or species habitat may occur within area
--	--

Name	Threatened	Type of Presence
Migratory Wetlands Species		
<a href="#"><i>Actitis hypoleucus</i></a>		
Common Sandpiper [59309]		Species or species habitat may occur within area
<a href="#"><i>Calidris acuminata</i></a>		
Sharp-tailed Sandpiper [874]		Species or species habitat may occur within area
<a href="#"><i>Calidris ferruginea</i></a>		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
<a href="#"><i>Calidris melanotos</i></a>		
Pectoral Sandpiper [858]		Species or species habitat may occur within area
<a href="#"><i>Pandion haliaetus</i></a>		
Osprey [952]		Species or species habitat may occur within area

## Other Matters Protected by the EPBC Act

Commonwealth Land	[ Resource Information ]	
The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.		
<a href="#">Name</a>

Wandana	WA	
Warrawah	WA	
Wilroy	WA	

Invasive Species		[ Resource Information ]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.		

Name	Status	Type of Presence
Birds		
Columba livia Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area
Passer montanus Eurasian Tree Sparrow [406]		Species or species habitat likely to occur within area
Streptopelia senegalensis Laughing Turtle-dove, Laughing Dove [781]		Species or species habitat likely to occur within area

Mammals	
Canis lupus familiaris Domestic Dog [82654]	Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Capra hircus</i> Goat [2]		Species or species habitat likely to occur within area
<i>Felis catus</i> Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
Feral deer Feral deer species in Australia [85733]		Species or species habitat likely to occur within area
<i>Mus musculus</i> House Mouse [120]		Species or species habitat likely to occur within area
<i>Oryctolagus cuniculus</i> Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
<i>Sus scrofa</i> Pig [6]		Species or species habitat likely to occur within area
<i>Vulpes vulpes</i> Red Fox, Fox [18]		Species or species habitat likely to occur within area

Plants		
<i>Carrichtera annua</i> Ward's Weed [9511]		Species or species habitat may occur within area
<i>Cenchrus ciliaris</i> Buffel-grass, Black Buffel-grass [20213]		Species or species habitat may occur within area
<i>Chrysanthemoides monilifera</i> Bitou Bush, Boneseed [18983]		Species or species habitat may occur within area
<i>Tamarix aphylla</i> Athel Pine, Athel Tree, Tamarisk, Athel Tamarisk, Athel Tamarix, Desert Tamarisk, Flowering Cypress, Salt Cedar [16018]		Species or species habitat likely to occur within area

## Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

**Conservation Codes**

T - Rare or likely to become extinct  
 X - Presumed extinct  
 IA - Protected under international agreement  
 S - Other specially protected fauna  
 1 - Priority 1  
 2 - Priority 2  
 3 - Priority 3  
 4 - Priority 4  
 5 - Priority 5

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

**Conservation Codes**

T - Rare or likely to become extinct  
 X - Presumed extinct  
 IA - Protected under international agreement  
 S - Other specially protected fauna  
 1 - Priority 1  
 2 - Priority 2  
 3 - Priority 3  
 4 - Priority 4  
 5 - Priority 5

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

---------	--------------	-------------	-------------------	------------------------------------

## Amphibian

1. 25401 *Crinia pseudinsignifera* (Bleating Froglet)
2. 25408 *Heleioporus albopunctatus* (Western Spotted Frog)
3. 25410 *Heleioporus eyrei* (Moaning Frog)
4. 25412 *Heleioporus psammophilus* (Sand Frog)
5. 25415 *Limnodynastes dorsalis* (Western Banjo Frog)
6. 25388 *Litoria moorei* (Motorbike Frog)
7. 25420 *Myobatrachus gouldii* (Turtle Frog)
8. 25421 *Neobatrachus albipes* (White-footed Trilling Frog)
9. 25425 *Neobatrachus kunapalari* (Kunapalari Frog)
10. 25426 *Neobatrachus pelobatoides* (Humming Frog)
11. 25428 *Neobatrachus wilsmorei* (Plonking Frog)
12. 25433 *Pseudophryne guentheri* (Crawling Toadlet)

## Bird

13. 24559 *Acanthagenys rufogularis* (Spiny-cheeked Honeyeater)
14. 24260 *Acanthiza apicalis* (Broad-tailed Thornbill, Inland Thornbill)
15. 24261 *Acanthiza chrysorrhoa* (Yellow-rumped Thornbill)
16. 25527 *Acanthiza iredalei* (Samphire Thornbill, Slender-billed Thornbill)
17. 24265 *Acanthiza uropygialis* (Chestnut-rumped Thornbill)
18. 25535 *Accipiter cirrocephalus* (Collared Sparrowhawk)
19. 25536 *Accipiter fasciatus* (Brown Goshawk)
20. 24282 *Accipiter fasciatus* subsp. *fasciatus* (Brown Goshawk)
21. 25755 *Acrocephalus australis* (Australian Reed Warbler)
22. 41323 *Actitis hypoleucos* (Common Sandpiper)
23. 25544 *Aegotheles cristatus* (Australian Owlet-nightjar)
24. 24310 *Anas castanea* (Chestnut Teal)
25. 24312 *Anas gracilis* (Grey Teal)
26. 24315 *Anas rhynchos* (Australasian Shoveler)
27. 25550 *Anas rhynchos* subsp. *rhynchos* (Australasian Shoveler)
28. 24316 *Anas superciliosa* (Pacific Black Duck)
29. 47414 *Anhinga novaehollandiae* (Australasian Darter)
30. 24561 *Anthochaera carunculata* (Red Wattlebird)
31. 25670 *Anthus australis* (Australian Pipit)
32. 25528 *Aphelocephala leucopsis* (Southern Whiteface)
33. 24266 *Aphelocephala leucopsis* subsp. *castaneiventris* (Southern Whiteface)
34. 25554 *Apus pacificus* (Fork-tailed Swift, Pacific Swift)
35. 24285 *Aquila audax* (Wedge-tailed Eagle)
36. 25558 *Ardea ibis* (Cattle Egret)

#### Conservation Codes

- T - Rare or likely to become extinct
- X - Presumed extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

## Amphibian

1. 25408 *Heleioporus albopunctatus* (Western Spotted Frog)
2. 25415 *Limnodynastes dorsalis* (Western Banjo Frog)
3. 25388 *Litoria moorei* (Motorbike Frog)
4. 25425 *Neobatrachus kunapalari* (Kunapalari Frog)
5. 25426 *Neobatrachus pelobatoides* (Humming Frog)
6. 25427 *Neobatrachus sutor* (Shoemaker Frog)
7. 25428 *Neobatrachus wilsmorei* (Plonking Frog)
8. 25433 *Pseudophryne guentheri* (Crawling Toadlet)

## Bird

9. 24559 *Acanthagenys rufogularis* (Spiny-cheeked Honeyeater)
10. 24260 *Acanthiza apicalis* (Broad-tailed Thornbill, Inland Thornbill)
11. 24261 *Acanthiza chrysorrhoa* (Yellow-rumped Thornbill)
12. 24263 *Acanthiza iredalei* subsp. *iredalei* (Samphire Thornbill, Slender-billed Thornbill)
13. 24264 *Acanthiza robustirostris* (Slaty-backed Thornbill)
14. 24265 *Acanthiza uropygialis* (Chestnut-rumped Thornbill)
15. 25535 *Accipiter cirrocephalus* (Collared Sparrowhawk)
16. 25536 *Accipiter fasciatus* (Brown Goshawk)
17. 25544 *Aegotheles cristatus* (Australian Owlet-nightjar)
18. 24312 *Anas gracilis* (Grey Teal)
19. 24316 *Anas superciliosa* (Pacific Black Duck)
20. 24599 *Anthus australis* subsp. *australis* (Australian Pipit)
21. 25528 *Aphelocephala leucopsis* (Southern Whiteface)
22. 24285 *Aquila audax* (Wedge-tailed Eagle)
23. 24610 *Ardeotis australis* (Australian Bustard)
24. 25566 *Artamus cinereus* (Black-faced Woodswallow)
25. 24353 *Artamus cyanopterus* (Dusky Woodswallow)
26. 24355 *Artamus minor* (Little Woodswallow)
27. 24356 *Artamus personatus* (Masked Woodswallow)
28. 24318 *Aythya australis* (Hardhead)
29. *Barnardius zonarius*
30. 24359 *Burhinus grallarius* (Bush Stone-curlew)
31. 24725 *Cacatua roseicapilla* subsp. *assimilis* (Galah)
32. 25716 *Cacatua sanguinea* (Little Corella)
33. 24727 *Cacatua sanguinea* subsp. *westralensis* (Little Corella)
34. 42307 *Cacomantis pallidus* (Palid Cuckoo)
35. 24786 *Calidris melanotos* (Pectoral Sandpiper)
36. 25717 *Calyptorhynchus banksii* (Red-tailed Black-Cockatoo)

- 192. 24108 *Sminthopsis crassicaudata* (Fat-tailed Dunnart)
- 193. 24109 *Sminthopsis dolichura* (Little long-tailed Dunnart)
- 194. 24114 *Sminthopsis hirtipes* (Hairy-footed Dunnart)
- 195. 24207 *Tachyglossus aculeatus* (Short-beaked Echidna)
- 196. 24175 *Taphozous georgianus* (Common Sheath-tailed Bat)
- 197. 24176 *Taphozous hilli* (Hill's Sheathtail-bat)
- 198. 24205 *Vespadelus finlaysoni* (Finlayson's Cave Bat)

#### Reptile

- 199. 25243 *Acanthophis pyrrhus* (Desert Death Adder)
- 200. 42380 *Brachyurophis fasciolatus* subsp. *fasciolatus* (Narrow-banded Shovel-nosed Snake)
- 201. 25339 *Chelodina steindachneri* (Flat-shelled Turtle)
- 202. 25456 *Crenadactylus ocellatus* (Clawless Gecko)
- 203. 24919 *Crenadactylus ocellatus* subsp. *horni* (Clawless Gecko)
- 204. 30893 *Cryptoblepharus buchananii*
- 205. 25020 *Cryptoblepharus plagioccephalus*
- 206. 25460 *Ctenophorus maculatus* (Spotted Military Dragon)
- 207. 24882 *Ctenophorus nuchalis* (Central Netted Dragon)
- 208. 24886 *Ctenophorus reticulatus* (Western Netted Dragon)
- 209. 24889 *Ctenophorus scutulatus* (Lozenge-marked Dragon)
- 210. 25023 *Ctenotus alleni*
- 211. 25054 *Ctenotus mimetes*
- 212. 25463 *Ctenotus pantherinus* (Leopard Ctenotus)
- 213. 25065 *Ctenotus pantherinus* subsp. *pantherinus* (Leopard Ctenotus)
- 214. 25074 *Ctenotus schomburgkii*
- 215. 25075 *Ctenotus severus*
- 216. 25465 *Ctenotus uber* (Spotted Ctenotus)
- 217. 25080 *Ctenotus uber* subsp. *uber* (Spotted Ctenotus)
- 218. 25086 *Cyclodomorphus branchialis* (Gilled Slender Blue-tongue Skink)
- 219. 25087 *Cyclodomorphus celatus* (Western Slender Blue-tongue)
- 220. 24995 *Delma australis*
- 221. 24929 *Diplodactylus granariensis* subsp. *granariensis*
- 222. 24940 *Diplodactylus pulcher*
- 223. 25092 *Egernia depressa* (Southern Pygmy Spiny-tailed Skink)
- 224. 25107 *Egernia stokesii* subsp. *badia* (Western Spiny-tailed Skink, Gidgee Skink)
- 225. 25109 *Eremiascincus richardsonii* (Broad-banded Sand Swimmer)
- 226. 24958 *Gehyra punctata*
- 227. 24959 *Gehyra variegata*
- 228. 24961 *Heteronotia binoei* (Bynoe's Gecko)
- 229. 25137 *Lerista gerrardi*
- 230. *Lerista kingi*
- 231. 25155 *Lerista muelleri*
- 232. 25165 *Lerista praepedita*
- 233. 42411 *Lerista timida*
- 234. 25182 *Lerista yuna* (Yuna broad-blazed slider, skink)
- 235. 25005 *Lialis burtonis*
- 236. 42415 *Lucasium squarrosum*
- 237. 25184 *Menetia greyii*
- 238. 25186 *Menetia surda* subsp. *cresswelli*

Name ID	Species Name	Naturalised	Conservation Code	<sup>1</sup> Endemic To Query Area
239.	24904 <i>Moloch horridus</i> ( <i>Thorny Devil</i> )			
240.	25190 <i>Morethia butleri</i>			
241.	24968 <i>Nephrurus levis</i> subsp. <i>occidentalis</i>			
242.	24976 <i>Oedura marmorata</i> ( <i>Marbled Velvet Gecko</i> )			
243.	25254 <i>Parasuta monachus</i>			
244.	25510 <i>Pogona minor</i> ( <i>Dwarf Bearded Dragon</i> )			
245.	24907 <i>Pogona minor</i> subsp. <i>minor</i> ( <i>Dwarf Bearded Dragon</i> )			
246.	25262 <i>Pseudechis butleri</i> ( <i>Spotted Mulga Snake</i> )			
247.	42416 <i>Pseudonaja mengdeni</i> ( <i>Western Brown Snake</i> )			
248.	25263 <i>Pseudonaja modesta</i> ( <i>Ringed Brown Snake</i> )			
249.	25009 <i>Pygopus nigriceps</i>			
250.	24982 <i>Rhynchoedura ornata</i> ( <i>Western Beaked Gecko</i> )			
251.	25266 <i>Simoselaps bertholdi</i> ( <i>Jan's Banded Snake</i> )			
252.	24946 <i>Strophurus strophurus</i>			
253.	25269 <i>Suta fasciata</i> ( <i>Rosen's Snake</i> )			
254.	25203 <i>Tiliqua occipitalis</i> ( <i>Western Bluetongue</i> )			
255.	25207 <i>Tiliqua rugosa</i> subsp. <i>rugosa</i>			
256.	25211 <i>Varanus caudolineatus</i>			
257.	25212 <i>Varanus eremius</i> ( <i>Pygmy Desert Monitor</i> )			
258.	25524 <i>Varanus panoptes</i> ( <i>Yellow-spotted Monitor</i> )			

**Conservation Codes**

T - Rare or likely to become extinct  
 X - Presumed extinct  
 IA - Protected under international agreement  
 S - Other specially protected fauna  
 1 - Priority 1  
 2 - Priority 2  
 3 - Priority 3  
 4 - Priority 4  
 5 - Priority 5

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.
