Dear Mr Hickey

Clearing Permit Application - Authorisation to clear in Main Roads Reserve for Intersection on Chidlow York Road SLK 25.82

This is to certify that Main Roads Western Australia Wheatbelt Region (Main Roads) grants permission for Alkina Holdings Pty Ltd (Alkina Holdings) and/or their contractors to clear in the Main Roads road reserve on York Chidlow Road (Great Southern Highway) at SLK 25.82, approximately 20 km west of York for the purposes of intersection upgrades associated with the Great Southern Landfill project. Main Roads further grants permission for Alkina Holdings and its contractors to access the Chidlow York road reserve (PIN 11408616), Inkpen and Lot 29259 on Plan 21496, St Ronan's and Inkpen, for the proposed works.

It is understood that approximately 0.78 ha of clearing is proposed within the Main Roads road reserve, including approximately 10 individual trees. It is noted that intersection design is currently at 85 %. Once design is progressed to 100%, it will need to be submitted for approval by Main Roads. An *Application Form to Undertake Work within the Road Reserve – Complex Works* will also need to be submitted by Alkina Holdings and approved by Main Roads prior to any works being undertaken within the road reserve.

Alkina Holdings is responsible for undertaking an environmental impact assessment for this project, and obtaining any necessary environmental and heritage approvals. Of particular note, the 10 individual trees to be removed may meet referral requirements for the Department of the Environment and Energy as potential Black Cockatoo breeding habitat. It is the responsibility of the third party conducting the works to ensure that adequate approvals and management are in place prior to works being undertaken.

Should you have any further queries regarding environmental approvals requirements for the project, please feel free to contact Lyn Van Gorp, Wheatbelt Environment Officer on (08) 9323 4459.

Yours sincerely

Janet Hartley-West
Network Manager, Wheatbelt Region
