

Appendix N: Misclassified Quadrats Manually Reassigned within the Floristic Classification

Quadrat	Reallocation	Reasoning
MCK042	Cluster 3 to VT 1	Quadrat located close to other quadrats classified as VT 1 and represented the same type of vegetation. Lower taxon richness than quadrats in Cluster 3
MCK038	Cluster 12 to VT 3	Same vegetation and VT 3, quadrat believed to be in transition zone between vegetation types which affected the analysis
MCK046	Cluster 6 to VT 9	Closely related to Cluster 9 (see Appendix L). Vegetation in poor condition and has much lower species richness than the other quadrats in Cluster 6
MCK104	Cluster 7 to VT 10	Closely related to Cluster 10 (see Appendix L). Some influence of nearby minor flow line affected analysis
MCK020	Cluster 8 to VT 7	Quadrat placed in transition zone, with part of quadrat extending into the broad edge of sheetflow zone. Analysis split quadrat adjacent to Cluster 7
MCK063	Cluster 8 to VT 7	Quadrat placed in transition zone, with part of quadrat extending into the broad edge of sheetflow zone. Analysis split quadrat adjacent to Cluster 7
MCK080	Cluster 9 to VT 5	Quadrat in Degraded condition and very taxon poor. Location on flood plain justifies reassignment to VT 5
MCK076	Cluster 11 to VT 10	Quadrat placed in transition zone, very taxon poor compared to other quadrats in VT 11
MCK118	Cluster 11 to VT 10	Quadrat placed in transition zone, very taxon poor compared to other quadrats in VT 11
