

H5: E1Te	<i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> low open woodland over <i>Triodia epactia</i> open hummock grassland
Distribution and Comments	This vegetation occurred in large areas on the steep south-facing slopes of the tall range of hills in the eastern half of the study area, and was also recorded from other hill slopes throughout the study area. <i>Triodia epactia</i> was the dominant spinifex but small amounts of <i>T. wiseana</i> or <i>T. brizoides</i> were recorded in places. Some records of the Priority 1 <i>Hibiscus</i> sp. Mt Brockman (E. Thoma ET 1354) and Priority 2 <i>Hibiscus</i> sp. Gurinbiddy Range (M.E. Trudgen MET 15708) were made in rocky areas within this vegetation type.
Other Associated Species	<u>Trees:</u> <i>Acacia pruinocarpa</i> , <i>Hakea lorea</i> subsp. <i>loreana</i> . <u>Tall Shrubs:</u> <i>Acacia kempeana</i> . <u>Shrubs:</u> <i>Acacia exigua</i> , <i>A. maitlandii</i> , <i>A. pyrifolia</i> var. <i>pyrifolia</i> , <i>Senna ferraria</i> , <i>S. glutinosa</i> subsp. <i>glutinosa</i> , <i>S. glutinosa</i> subsp. <i>pruinosa</i> . <u>Low Shrubs:</u> <i>Indigofera monophylla</i> , <i>Keraudrenia nephrosperma</i> , <i>Ptilotus calostachyus</i> , <i>P. obovatus</i> var. <i>obovatus</i> , <i>Solanum lasiophyllum</i> . <u>Grasses:</u> <i>Eriachne mucronata</i> (typical form), <i>Paraneurachne muelleri</i> . <u>Herbs:</u> <i>Cucumis variabilis</i> , <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i> , <i>Goodenia cusackiana</i> , <i>G. microptera</i> , <i>Polycarphaea holtzei</i> , <i>Ptilotus auriculifolius</i> , <i>P. nobilis</i> subsp. <i>nobilis</i> , <i>P. polystachyus</i> .
Vegetation Condition	Excellent.
Sites in the Study Area	Quadrat BNVR02 (initially sampled as BNV02 by Biota 2014a), BNV09 (Biota 2014a) and BMF22.

H6: ElAciAprTe	<i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> scattered low trees over <i>Acacia pruinocarpa</i>, <i>A. citrinoviridis</i> tall open shrubland over <i>Triodia epactia</i> open hummock grassland
Distribution and Comments	This vegetation type was recorded from only a few patches on the south-facing slopes of the range of hills in the eastern section of the study area. Scattered tall shrubs of <i>Grevillea berryana</i> were also typically present, along with occasional <i>Eremophila latrobei</i> subsp. <i>latrobei</i> shrubs and <i>Sida</i> sp. Shovelanna Hill (S. van Leeuwen 3842) low shrubs. <i>Triodia epactia</i> was the dominant spinifex however scattered <i>T. wiseana</i> and <i>T. brizoides</i> hummocks were sometimes recorded, intruding from surrounding vegetation types.
Other Associated Species	<p><u>Tall Shrubs:</u> <i>Acacia aptaneura</i>, <i>A. atkinsiana</i>, <i>A. pyrifolia</i> var. <i>pyrifolia</i>.</p> <p><u>Shrubs:</u> <i>Jasminum didymum</i> subsp. <i>lineare</i>, <i>Senna artemisioides</i> subsp. <i>oligophylla</i>, <i>S. ferraria</i>, <i>S. glutinosa</i> subsp. <i>glutinosa</i>.</p> <p><u>Low Shrubs:</u> <i>Corchorus lasiocarpus</i> subsp. <i>lasiocarpus</i>, <i>Eremophila exilifolia</i>, <i>Keraudrenia nephrosperma</i>, <i>Ptilotus obovatus</i> var. <i>obovatus</i>, <i>Senna notabilis</i>, <i>Solanum diversiflorum</i>, <i>S. horridum</i>, <i>S. lasiophyllum</i>, <i>Tribulus suberosus</i>.</p> <p><u>Grasses:</u> <i>Cymbopogon ambiguus</i>, <i>Eriachne mucronata</i> (typical form), <i>E. pulchella</i>, <i>Paspalidium clementii</i>.</p> <p><u>Herbs:</u> <i>Cheilanthes brownii</i>, <i>Cucumis variabilis</i>, <i>Duperreya commixta</i>, <i>Dysphania rhadinostachya</i>, <i>Gomphrena canescens</i> subsp. <i>canescens</i>, <i>Goodenia cusackiana</i>, <i>G. microptera</i>, <i>Haloragis gossei</i>, <i>Hybanthus aurantiacus</i>, <i>Oldenlandia crouchiana</i>, <i>Phyllanthus erwinii</i>, <i>Polycarphaea holtzei</i>, <i>P. longiflora</i>, <i>Pterocaulon sphacelatum</i>, <i>Ptilotus auriculifolius</i>, <i>P. clementii</i>, <i>P. fusiformis</i>, <i>P. polystachyus</i>, <i>Streptoglossa bubakii</i>, <i>S. decurrens</i>, <i>Trachymene oleracea</i> subsp. <i>oleracea</i>, <i>Trichodesma zeylanicum</i> var. <i>zeylanicum</i>.</p>
Vegetation Condition	Excellent to Very Good: occasional records of * <i>Sigesbeckia orientalis</i> and * <i>Vachellia farnesiana</i> .

H7: EITw	<i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> scattered low trees over <i>Triodia wiseana</i> open hummock grassland
Distribution and Comments	This vegetation occurred generally over stony hills throughout the study area, and was applied to areas that did not have a prominent shrub component. Despite the lack of cover, several shrub species were commonly recorded, including <i>Acacia maitlandii</i> , <i>Indigofera monophylla</i> , <i>Ptilotus calostachyus</i> , <i>Senna glutinosa</i> subsp. <i>glutinosa</i> , <i>S. glutinosa</i> subsp. <i>pruinosa</i> and <i>Tribulus suberosus</i> . The hummock grassland was dominated by <i>Triodia wiseana</i> , with scattered <i>T. epactia</i> occurring around drainage lines and in low-lying areas.
Other Associated Species	<u>Trees:</u> <i>Corymbia deserticola</i> subsp. <i>deserticola</i> , <i>Hakea chordophylla</i> . <u>Shrubs:</u> <i>Acacia bivenosa</i> , <i>A. exigua</i> , <i>Senna artemisioides</i> subsp. <i>oligophylla</i> . <u>Low Shrubs:</u> <i>Dampiera candicans</i> , <i>Goodenia stobbsiana</i> , <i>Keraudrenia nephrosperma</i> , <i>Solanum lasiophyllum</i> . <u>Grasses:</u> <i>Amphipogon sericeus</i> , <i>Aristida contorta</i> , <i>A. holathera</i> var. <i>holathera</i> , <i>Enneapogon polyphyllus</i> , <i>Eriachne mucronata</i> (typical form), <i>E. pulchella</i> , <i>Paraneurachne muelleri</i> , <i>Paspalidium clementii</i> , <i>Schizachyrium fragile</i> . <u>Herbs:</u> <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i> , <i>Goodenia microptera</i> , <i>Oldenlandia crouchiana</i> , <i>Polycarphae holtzei</i> , <i>Polygala glaucifolia</i> , <i>Ptilotus nobilis</i> subsp. <i>nobilis</i> , <i>Trachymene oleracea</i> subsp. <i>oleracea</i> .

H7: quadrat BMF23.

H8: EITwTbt	<i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> scattered low trees over <i>Triodia wiseana</i>, (<i>T. basitricha</i>) open hummock grassland
Distribution and Comments	This vegetation occurred on the lower colluvial hills at the southern edge of the tall range in the eastern half of the study area. This unit was generated primarily to identify areas of known or prospective habitat for the Priority 3 spinifex species <i>Triodia basitricha</i> ; it was otherwise not substantially different to vegetation type H7 (EITw). <i>Triodia wiseana</i> was the dominant spinifex in this vegetation type, but small to large patches of <i>Triodia basitricha</i> were recorded at various locations and should be considered to occur more widely throughout this unit.
Other Associated Species	<u>Trees:</u> <i>Corymbia deserticola</i> subsp. <i>deserticola</i> , <i>C. hamersleyana</i> . <u>Tall Shrubs:</u> <i>Acacia marramamba</i> . <u>Shrubs:</u> <i>Acacia atkinsiana</i> , <i>A. bivenosa</i> , <i>A. maitlandii</i> , <i>Senna glutinosa</i> subsp. <i>pruinosa</i> . <u>Low Shrubs:</u> <i>Goodenia stobbsiana</i> , <i>Indigofera monophylla</i> , <i>Ptilotus calostachyus</i> , <i>Solanum lasiophyllum</i> . <u>Grasses:</u> <i>Amphipogon sericeus</i> , <i>Aristida contorta</i> , <i>A. holathera</i> var. <i>holathera</i> , <i>Eriachne aristidea</i> , <i>E. pulchella</i> , <i>Paraneurachne muelleri</i> . <u>Herbs:</u> <i>Dysphania rhadinostachya</i> , <i>Euphorbia australis</i> var. <i>subtomentosa</i> , <i>Gomphrena cunninghamii</i> , <i>Goodenia microptera</i> , <i>Oldenlandia crouchiana</i> , <i>Polycarphae holtzei</i> , <i>Ptilotus auriculifolius</i> , <i>P. fusiformis</i> , <i>P. nobilis</i> subsp. <i>nobilis</i> , <i>Trachymene oleracea</i> subsp. <i>oleracea</i> .

H8: quadrat MMFR07.

H9: ElAbTbr	<i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> scattered low trees over <i>Acacia bivenosa</i> open shrubland over <i>Triodia brizoides</i> hummock grassland
Distribution and Comments	This vegetation occurred on the slopes of moderate-sized hills in the central section of the study area. It was similar to vegetation type P2, but due to its location on hill slopes it lacked a number of the species found in the latter vegetation on the flats. The spinifex hummock grassland was strongly dominated by <i>T. brizoides</i> ; although patches of <i>T. epactia</i> did occur in places, these largely formed a separate vegetation type (H5: EITe), and only scattered individuals of <i>T. wiseana</i> were sometimes recorded.
Other Associated Species	<p><u>Tall Shrubs:</u> <i>Acacia synchronicia</i>.</p> <p><u>Shrubs:</u> <i>Acacia maitlandii</i>, <i>Senna artemisioides</i> subsp. <i>helmsii</i>, <i>S. glutinosa</i> subsp. <i>glutinosa</i>, <i>S. glutinosa</i> subsp. <i>x luerssenii</i>, <i>S. glutinosa</i> subsp. <i>pruinosa</i>.</p> <p><u>Low Shrubs:</u> <i>Ptilotus obovatus</i> var. <i>obovatus</i>, <i>Solanum lasiophyllum</i>.</p> <p><u>Grasses:</u> <i>Aristida contorta</i>, <i>Enneapogon polyphyllus</i>, <i>Eriachne mucronata</i> (typical form), <i>E. pulchella</i>, <i>Iseilema dolichotrichum</i>, <i>Paspalidium clementii</i>.</p> <p><u>Herbs:</u> <i>Cleome viscosa</i>, <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i>, <i>Gomphrena cunninghamii</i>, <i>Goodenia muelleriana</i>, <i>Lepidium pholidogynum</i>, <i>Oldenlandia crouchiana</i>, <i>Polycarphaea holtzei</i>, <i>P. longiflora</i>, <i>Polygala glaucifolia</i>, <i>Ptilotus auriculifolius</i>, <i>P. nobilis</i> subsp. <i>nobilis</i>, <i>Rhynchosia minima</i>, <i>Streptoglossa decurrents</i>, <i>Swainsona maccullochiana</i>, <i>Trachymene oleracea</i> subsp. <i>oleracea</i>, <i>Trichodesma zeylanicum</i> var. <i>zeylanicum</i>.</p>

A2: AxAapTspp	Acacia xiphophylla, (A. aptaneura) tall shrubland over Triodia spp. very open hummock grassland
Distribution and Comments	<p>This vegetation occurred in patches on the plains throughout the study area, and also occurred occasionally on low hills. The substrate was less clayey than that supporting vegetation type A1. The overstorey was dominated by <i>Acacia xiphophylla</i> (either as a tall shrub or low tree), usually with lesser amounts of <i>A. aptaneura</i>, and very occasionally with scattered <i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i>. There was typically little or no shrub cover in the middle strata, however scattered shrubs of <i>Acacia synchronicia</i>, <i>Eremophila cuneifolia</i>, <i>Maireana georgei</i>, <i>Ptilotus schwartzii</i> var. <i>schwartzii</i>, <i>Senna artemisioides</i> subsp. <i>oligophylla</i>, <i>S. glutinosa</i> subsp. <i>x luerssenii</i>, <i>S. glutinosa</i> subsp. <i>pruinosa</i> and <i>S. stricta</i> were usually present.</p> <p>The ground layer typically comprised a very open hummock grassland, which was dominated by various combinations of all the spinifex species present on site (typically <i>Triodia angusta</i>, <i>T. brizoides</i>, <i>T. epactia</i> and <i>T. wiseana</i>, but occasionally <i>T. longiceps</i>). While previous mapping exercises distinguished separate vegetation types within these Snakewood shrublands based on the spinifex species present, this was not found to be useful for the current exercise, as the dominant species seemed to merely reflect whatever species were present in the immediate surrounds and the cover was highly variable (even within a stand).</p>
Other Associated Species	<p><u>Tall Shrubs:</u> <i>Rhagodia eremaea</i>.</p> <p><u>Shrubs:</u> <i>Abutilon lepidum</i>, <i>Acacia bivenosa</i>, <i>Jasminum didymum</i> subsp. <i>lineare</i>.</p> <p><u>Low Shrubs:</u> <i>Maireana melanocoma</i>, <i>Ptilotus astrolasius</i>, <i>P. obovatus</i> var. <i>obovatus</i>, <i>Solanum lasiophyllum</i>, <i>Tribulus suberosus</i>.</p> <p><u>Grasses:</u> <i>Aristida contorta</i>, <i>Enneapogon caerulescens</i>, <i>E. polyphyllus</i>, <i>Eriachne aristidea</i>, <i>E. pulchella</i>, <i>Paspalidium clementii</i>, <i>Sporobolus australasicus</i>.</p> <p><u>Herbs:</u> <i>Duperreya commixta</i>, <i>Goodenia forrestii</i>, <i>G. microptera</i>, <i>Lepidium pholidogynum</i>, <i>Polycarphaea holtzei</i>, <i>Ptilotus auriculifolius</i>, <i>P. helipteroides</i>, <i>P. nobilis</i> subsp. <i>nobilis</i>, <i>Sclerolaena eriacantha</i>, <i>Trachymene oleracea</i> subsp. <i>oleracea</i>, <i>Trichodesma zeylanicum</i> var. <i>zeylanicum</i>.</p>
Vegetation Condition	Excellent to Very Good: scattered weeds sometimes present (particularly * <i>Flaveria trinervia</i>).
Sites in the Study Area	Quadrats BRO23 and BRO43 (Biota 2005), WQR02 (Biota 2007a), MMFR10 (originally sampled as MMF10 in Biota 2013a), BMF26 and BMF31; relevés BRO-MI (Biota 2005), BMF-RMG, BMF-RMP and BMF-RMQ.

**A2: quadrat BMF31.****A2: relevé BMF-RMG.**

A3: AapAayTeTw	Acacia aptaneura, A. ayersiana low woodland over Triodia epactia, T. wiseana open hummock grassland
Distribution and Comments	This vegetation occurred in numerous stands throughout the study area, mainly on plains but also occasionally on hill crests. The two wattle species in the overstorey occurred either as low trees or tall shrubs, and usually occurred with scattered <i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> and <i>Grevillea berryana</i> . <i>Acacia ayersiana</i> occurred in two forms; the normal phyllode width and a narrow form (as per Maslin and Reid 2012). The middle strata were typically sparse, but scattered shrubs of <i>Eremophila forestii</i> subsp. <i>forestii</i> , <i>Keraudrenia nephrosperma</i> , <i>Senna glutinosa</i> subsp. <i>glutinosa</i> and <i>Tribulus suberosus</i> were usually present. The ground layer was a very open to open hummock grassland typically dominated by <i>Triodia epactia</i> and <i>T. wiseana</i> , but small amounts of <i>T. angusta</i> and <i>T. brizoides</i> were also sometimes present.
Other Associated Species	<u>Shrubs:</u> <i>Acacia bivenosa</i> , <i>Gossypium australe</i> (Burrup Peninsula form). <u>Low Shrubs:</u> <i>Hibiscus burtonii</i> , <i>Ptilotus calostachyus</i> , <i>P. obovatus</i> var. <i>obovatus</i> , <i>Senna notabilis</i> , <i>Solanum diversiflorum</i> . <u>Grasses:</u> <i>Aristida contorta</i> , <i>Enneapogon caeruleescens</i> , <i>E. polyphyllus</i> , <i>Eriachne aristidea</i> , <i>E. pulchella</i> , <i>Paspalidium clementii</i> . <u>Herbs:</u> <i>Cucumis variabilis</i> , <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i> , <i>Evolvulus alsinoides</i> var. <i>vilosicalyx</i> , <i>Goodenia microptera</i> , <i>Oldenlandia crouchiana</i> , <i>Polycarphaea corymbosa</i> var. <i>corymbosa</i> , <i>P. holtzei</i> , <i>Polygala glaucifolia</i> , <i>Pterocaulon sphacelatum</i> , <i>Ptilotus auriculifolius</i> , <i>P. fusiformis</i> , <i>P. nobilis</i> subsp. <i>nobilis</i> , <i>P. polystachyus</i> , <i>Streptoglossa bubakii</i> , <i>S. decurrens</i> , <i>Trachymene oleracea</i> subsp. <i>oleracea</i> , <i>Trichodesma zeylanicum</i> var. <i>zeylanicum</i> .
Vegetation Condition	Typically Excellent; occasionally Very Good (e.g. at BMF11 due to scattered * <i>Bidens bipinnata</i> and * <i>Setaria verticillata</i> , and signs of grazing animals).
Sites in the Study Area	Quadrats BRO04, BRO05 (Biota 2005), BMF11 and BMF14; relevé BMFRSPH.

A3: relevé BMFRSPH.

A4: AapAciTeTw	<i>Acacia aptaneura</i>, <i>A. citrinoviridis</i> tall shrubland over <i>Triodia epactia</i>, <i>T. wiseana</i> open hummock grassland
Distribution and Comments	This vegetation type occurred in several stands on hill slopes, and was particularly common in the eastern section of the study area. The tallest stratum was dominated by <i>Acacia aptaneura</i> , usually with lesser amounts of <i>A. citrinoviridis</i> ; both species typically occurred as tall shrubs but sometimes as low trees. Scattered trees of <i>Acacia pruinocarpa</i> , <i>Eucalyptus leucophloia</i> subsp. <i>leucophloia</i> and <i>Grevillea berryana</i> were also often present. Occasional small patches of <i>Acacia rhodophloia</i> were also present in the study area but these were included within this unit and not mapped separately. The middle shrub strata were typically sparse, but scattered shrubs of <i>Senna glutinosa</i> subsp. <i>glutinosa</i> and <i>Solanum lasiophyllum</i> were usually present. The open hummock grassland was often dominated by <i>Triodia epactia</i> , sometimes with <i>T. wiseana</i> .
Other Associated Species	<p><u>Tall Shrubs:</u> <i>Acacia atkinsiana</i>, <i>A. marramamba</i>, <i>Codonocarpus cotinifolius</i>.</p> <p><u>Shrubs:</u> <i>Capparis lasiantha</i>, <i>Jasminum didymum</i> subsp. <i>lineare</i>, <i>Senna glutinosa</i> subsp. <i>x luerssenii</i>.</p> <p><u>Low Shrubs:</u> <i>Eremophila exilifolia</i>, <i>Goodenia stobbsiana</i>, <i>Ptilotus calostachyus</i>, <i>Sida</i> sp. Shovelanna Hill (S. van Leeuwen 3842), <i>Tribulus suberosus</i>.</p> <p><u>Grasses:</u> <i>Eriachne mucronata</i> (typical form), <i>E. pulchella</i>, <i>Paraneurachne muelleri</i>, <i>Paspalidium clementii</i>.</p> <p><u>Herbs:</u> <i>Cucumis variabilis</i>, <i>Duperreya commixta</i>, <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i>, <i>Polycarphaea holtzei</i>, <i>Ptilotus auriculifolius</i>, <i>P. nobilis</i> subsp. <i>nobilis</i>, <i>Trachymene oleracea</i> subsp. <i>oleracea</i>, <i>Trichodesma zeylanicum</i> var. <i>zeylanicum</i>.</p>
Vegetation Condition	Excellent.
